

Many '52 Model Cars Adorn the Showrooms Here

The 1952 model cars are rapidly appearing on the show room floor as well as in the sales room. Last Saturday the Imperial Chevrolet Company had the 1952 Power Glide on display.

There is a total of 129 interior and exterior colors to select from the 1952 Chevrolets. It was also pointed out that there are 14 different 2-tone exterior colors.

Chevrolet was not the first 1952 model to show in Canyon. That distinction belongs to the Pontiac which was shown by the Stevenson Pontiac Company on December 3, 1951.

Although the date of the formal showing of the 1952 Pontiac was not until December 19, the new model arrived early and was shown early.

At the Randall Motor Company the new Plymouth went on display December 17 and the new De Soto was displayed on December 31 of last year. These cars also arrived several days ahead of their formal showing date in the dealer's show room.

The Chrysler was displayed by the Joyner Motor Company for a week beginning December 14. The Joyner Motor Company also handles the Plymouth and it was displayed there on January 4, its formal showing date.

One of the 1952 model cars that has not been shown yet is the Oldsmobile. It's to be unveiled on January 24 at the Oldsmobile Company here.

The Kaiser-Frazer is another new model that has not yet been shown here. It is expected soon but there is no definite word about its date of arrival.

The 1952 Ford is supposed to make its debut here on February 4. If the 1952 Kaiser-Frazer automobile gets here by that time it will complete the 1952 automobile showings in Canyon. The new Dodge, as well as the new Plymouth, have both been shown by the Samuelson Motor Company.

PTA Executive Committee Met Here Monday

Mrs. Orville K. Smith, President of Eighth District Texas Congress of Parents and Teachers, issued a call for the Executive Committee to meet in Canyon at 10:00 a. m., Monday, January 21 in the Blue Room of the College Cafeteria. She presided as chairman of the meeting.

The Executive Committee is composed of the president and seven area vice-presidents; Recording and Corresponding Secretaries (Parliamentarian sitting in). Five shall constitute a quorum.

Plans were made for the program of the Eighth District Spring Conference which is to be held in Canyon, April 21, 22 and 23.

Emmitt Smith will be chairman of the local planning committee for the Spring Conference. Members of the Executive Committee besides Mrs. Smith are Mrs. Ralph Randall, vice-president, Panhandle; Mrs. Arthur Corse, vice-president, Sunray; Mrs. Pat Powell, vice-president, Childress; Mrs. Elmer Patterson, vice-president, Hereford; Howard Oliphant, vice-president, Wellington; Mrs. James Fitzgerald, vice-president, Pampa; Mrs. L. L. Wylie, Recording Secretary, Phillips; Mrs. Clarence Blackburn, Corresponding Secretary, Childress; and Mrs. B. A. Wulman, Parliamentarian, Amarillo.

The three members of the state board of the Texas Congress of Parents and Teachers who live in the area: Mrs. W. D. Degraess, Amarillo; Mrs. Hugh Cypher, Borger; and Mrs. Crews Henry, Canyon, were asked by Mrs. Smith to sit in on the executive meeting.

Joyce Hill Granted Missionary Status In Methodist Church

Joyce Hill, daughter of Mr. and Mrs. George Hill, was one of 79 religious workers commissioned by the church at a special meeting in Buck Hill Falls, Pa. This is the largest group of missionaries and deaconesses ever to be commissioned at one time by the Methodist Church.

To prepare for her missionary teaching work in Latin America, she has been attending courses at Scarritt College in Nashville, Tenn., this past year.

A 1950 graduate of West Texas State College and an alumna of Canadian High School, Miss Hill taught school at Wildorado before enrolling in the college at Nashville.

The newly commissioned missionaries have been hearing discussions by returned missionaries and by Bishop Arthur J. Moore of Atlanta.

Commenting on the group of Christian workers as they received their commissions she was especially impressed with the "long parade of hundreds of years of service" they represent.

The Canyon News

Fifty-Sixth Year

Canyon, Texas Wednesday, January 23, 1952

Number 41

PMA Offers Services to Land Owners

The Randall County Production and Marketing Administration Committee in a called meeting, Tuesday, January 22, decided to install the Purchase Order Program similar to that used in several other counties in the Panhandle.

The program is one by which farmers are enabled to carry out some of the more expensive practices, such as, land leveling and terracing without being forced to carry the entire cost to the end of the year before assistance payment is made by the P. M. A.

Under the Purchase Order program the P. M. A. part of the cost is paid, on completion of the job, direct to the contractor. Only contractors (vendors) whose rates are approved by the county committee and who file cost certificates with the committee are issued purchase orders by P. M. A.

The committee hopes that the Purchase Order program will enable many farmers to build divers on terraces, to stop lake slope erosion, who could not otherwise finance the work.

A list of approved vendors and maximum fair prices charged are on file in the county P. M. A. office.

Clarence Beckman Asks Re-Election Commissioner No. 2

CLARENCE BECKMAN

The News is authorized to announce the candidacy of Clarence Beckman for re-election to the office of County Commissioner, Precinct No. 2.

His statement follows: "I have greatly appreciated the privilege of serving the taxpayers of Precinct No. 2, as well as those of the entire county during my term of office. I am confident that my record in office and the experience which I have received while serving you as Commissioner, fits me for better service in the future. I am basing my candidacy for re-election strictly upon this record and trust that voters of Precinct No. 2 will carefully consider my qualifications to continue serving them.

"All of you know that I have stood for strict economy during my tenure of office, and I shall continue to work with all members of the Commissioners Court for the benefit of all citizens of the county. I am devoting my time to looking after the county's business in a business like manner.

"I hope that I shall see each and every voter in Precinct No. 2 during the campaign, but if I should miss any one of you it will be entirely unintentional. I shall consider it a great compliment and pledge of your confidence in me to continue in your service in this important office," continued Mr. Beckman.

LATEST BOWLING SCORES FOR WOMEN'S LEAGUE REVEALED

Canyon Drug won two games. Individual scores are: Shero, 326; Hardaway, 355; Bremer, 318; Odom, 404; and Wilson, 333.

Palo Duro Dress Shop won one game with individual scores: Foster, 440; McGehee, 323; Higgins, 300; J. Davis, 379; and V. Davis, 303.

T. A. Black Dry Goods won two games. Individual scores: King, 311; B. Ford, 509; B. Brown, 394; W. Brown, 312; J. Ford, 317.

Thompson Hardware won one game with scores as follows: Blankenship, 289; Pond, 382; Bosley, 429; Colwell, 341; and Collingsworth, 291.

Mrs. Gladdis G. Samples left Friday for Corpus Christi where she is visiting in the home of her daughter, Mrs. Paul Aldridge, this week.

Bill Money Asks Re-Election Tax Assessor-Collector

BILL MONEY

The News is authorized to announce the candidacy of Bill Money for re-election to the office of Tax Assessor and Collector of Randall County.

"I am serving my first term as your Assessor and Collector, and my staff and I are striving to perform the duties of this office to the best interest of the voters both in Canyon and in South Amarillo.

"I have lived in Randall County most of my life and am well acquainted with the locations of most properties.

"I appreciate the confidence which the people of this county have shown in electing me Assessor and Collector, and I know that the experience which I have gained during the past year will enable me to be of greater service in the future if I am re-elected," stated Mr. Money.

C of C Soon To Have New Home

Thanks to T. A. Black, the Canyon Chamber of Commerce is to have a permanent home. Cecil Massey, executive secretary for the Chamber of Commerce, said it would be the first permanent home for the organization since World War II.

The new and permanent home of the Chamber is to be the office adjoining Tom Beard's Insurance Agency on the south side of the square.

Mr. Black is having the building completely remodeled into an attractive and appropriate office as headquarters for the local Chamber of Commerce.

Since relinquishing its office in the court house to the Red Cross, the Chamber of Commerce has been doing business from the Southwestern Public Service Company building.

No announcement was made as to the date that the office would be moved. It depends upon the work and working conditions in getting the new office completed.

4-H Club Starts Year by Meeting In Court House

The Randall County Court House was the scene of the meeting for local 4-H Club boys on January 19. The presiding president was Doyle Bourn.

One of the first tasks at hand was that of electing officers. Larry Porter was selected as president and Doyle Bourn was made vice-president. The position of Secretary-Treasurer was filled by Ted Lowe while Bernard Grabber was selected as the reporter.

More than two dozen people attended the meeting which had as its advisors, John Brazil, Mac Boswell and Joe Lindsey.

Others attending were: George Kuehler, Curtiss Stroup, Donald Ray Roberson, Jack Metcalf, Roland O'Donald, Tommy Davis, Aule Marshall and Art Miller.

Tom Marshall, Charles Conatser, Dale Henry, Doy Hammet, Stan Elliott and Wayne Cape were also in attendance at the 4-H Club meeting.

Those completing the attendance were: Dwayne Rutherford, Rhett Plank, Wayne Rutherford, Lewis Rutherford, George Dowlen, Doyle Bourn, Larry Porter, Ted Lowe, and Bernard Grabber.

RAINBOW ASSEMBLY TO MEET JAN. 28

The Canyon Rainbow assembly will have their stated meeting on Monday, January 28, at 6 o'clock in the evening at the Masonic Hall.

Miss Mary Ruth Hill spent the weekend in Portales in the home of her sister, Mrs. Garland K. Cavitt.

Bufs Lead in Border Circuit -- Tech Coming

The Buffaloes journeyed to Abilene Monday, defeating Hardin-Simmons by a score of 60-54 in the first basketball encounter of the season.

The Bufs trailed 24-26 at the half.

Troy Burrus was the top man for the Bufs, scoring 25 points, 11 of which were free throws. He missed only two of the gratis shots.

The Bufs will meet the Red Raiders from Texas Tech at the new Field House Thursday night. The Bufs hold a lead of 46 to 15 games since Tech was established. The Bufs hold the top of the Border Conference.

The team will play Texas Western in El Paso Monday night and New Mexico A&M at Las Cruces on Tuesday night.

Canyon Area Tops County in Total Moisture for '51

A check of the 1951 rainfall from gauges located in various parts of the county shows that the Canyon area received more moisture than any other part of the county.

The Canyon area received 2.05 inches more moisture than the next highest place which was registered by the Anton Handing gauge in the west northwest section of the county.

Total rainfall for Canyon in 1951 was 24.11 inches. The Anton Handing gauge showed that the west northwest section received 22.06 inches of moisture during the year.

At Umbarger the moisture for the year totaled 19.52 while experiment station no. 5, in the northwest corner of the county, received only 16.89 inches of moisture during the past year.

At experiment station no. 6, which is also in the northwest section of the county, the 1951 rainfall amounted to 18.59 inches. The R. B. Gist gauge, in the southeast part of the county, registered 18.80 inches of moisture.

Roy Byrd took the reading in the southwest part of the county and his gauge showed 18.57 inches of moisture for this part of the county.

At Ralph Switch the year's total was 19.41.

Average amount of moisture for Randall County, figured from these eight stations, is 19.74 inches of moisture for the year of 1951.

Geology Instructor, Museum Curator, Assumes Duties at West Texas State

Jack T. Hughes, who recently took over the position of instructor of geology at West Texas State College, is also the curator of paleontology at the Museum. Mr. Hughes has been associated with these subjects more than ten years.

At the University of Texas,

Hughes had a double major of anthropology and geology. He received his B. A. degree in 1941. Early in 1942 he received his M. A. from Texas University. He received this degree in absentia while doing work at the National University of Mexico in Mexico City. He attended one long term there which he explained lasted from March until December.

From 1943 until 1946 Hughes served in the U. S. Navy. This work took him into the field of communication and he served in the South Pacific and Gulf Theaters.

Upon receiving his discharge the former naval Lieutenant went to Columbia University. In the spring semester of 1946 he started work on his Ph.D. Classroom work for this degree is finished, but he explained that he still has to write the thesis.

Prior to coming to Canyon Hughes worked with the Smithsonian Institution in River Basin Surveys. He was stationed at Lincoln, Nebraska, while working in the Missouri River Valley. This work in archeological and paleontological surveys was to discover the scientific value of various remains of value from these sources.

In the summer of 1950 he did archeological and paleontological work for the National Park Service of the University of Texas. This project was carried on in the lower Rio Grande Valley.

The summer of 1951 found Mr. Hughes in Dallas doing geophysical work. He remained there until he took his present position here with the college and the museum.

Mr. Hughes has a wife who answers to the name of Pollyanna. They have two children, Martha Elizabeth, who is three years of age, and David Thomas, who is 16 months old.

Hughes is presently helping Boone McClure to get the Museum prepared for next summer. With good luck they hope to have the upstairs complete and exhibits set out by the latter part of May. At the present time it is difficult to tell just when this job will be finished, Hughes explained.

Grass and Trash Fires Keep Local Firemen Busy

As local people settled down to hear England's Prime Minister, Winston Churchill, address the joint session of Congress last Thursday, the siren heralded another fire. It was a grass fire on the outskirts of the southeast corner of town. The blaze was believed to have started from a trash fire in the vicinity of some new buildings in that section.

Fires of this nature have been happening frequently during the past two weeks. Last Wednesday afternoon there was a fire in the alley at 2011 7th Avenue. They are especially dangerous during the high winds such have occurred in the past few weeks.

Because of the high winds and dry, inflammable condition of the grass, firemen have repeatedly voiced the need for caution in trash burning.

To date no serious fires are known to have started by the grass and trash fires, but firemen are skeptical of the continuation of this good luck. They feel that this is the time of year when that proverbial ounce of prevention, in precaution against fires, is worth much more than the pound of cure.

Fine of \$50 Assessed on Theft Charge

F. H. Kelly of Buffalo, New York, was fined \$50 and court cost in Judge Burney Slack's County Court Monday morning. Kelly was picked up Saturday afternoon by Chief of Police "Doc" Camp. At that time Kelly was reported as being under the influence of intoxicating drink.

A search of his effects produced one of the small, cardboard iron lungs with a small amount of money in it. These containers for donations are stationed at various places about town to aid the polio fund drive. It was revealed that the small container had been taken from the Post Office.

Monday morning Kelly entered a plea of guilty to the charge of theft, announced County Attorney McGlasson.

COUNCIL OF CHURCH WOMEN WILL MEET JANUARY 29

The Council of Church Women will meet Tuesday evening, January 29, at 7:00 p. m. as guests of the First Baptist Church.

Miss Ruth Sharpley is to read "The White Cliffs" by Alice Duer Miller. Miss Sharpley is a graduate of Wayland College with a major in Speech.

The meeting is open to all interested women.

L. S. Johnston Is Candidate Office Of County Sheriff

L. S. JOHNSTON

The News is authorized to announce the candidacy of L. S. Johnston for the office of Sheriff of Randall County. His statement follows:

"I have served in public office only one elective term, having been a member of the Commissioners Court from Precinct No. 1 for two years. I deeply appreciate the confidence that was shown in me by the voters of this precinct in electing me your Commissioner, and in the splendid vote of the people of Randall county for Sheriff two years ago.

If I am elected as your Sheriff in July, the experience which I have gained will be of great benefit to all of you in the office of Sheriff.

"I have been a resident of Randall county for 24 years and have lived in Canyon for 9½ years. I have been engaged in stock farming throughout these years and know the problems which confront the people of this county as a result of my long residence among you.

"If I am elected as your Sheriff, I will give you prompt and efficient service at all times, day or night. I shall have well qualified deputies who know the problems of the people of Randall county.

"I shall greatly appreciate the support of all voters of Randall county in this race for your Sheriff. While I shall make every effort to see you before the July primary, it may be possible that I will miss some voter through oversight or due to my failure to find you at home. I shall deem it a great honor if you will accept this printed statement as an invitation for you to support my candidacy in this race. I shall give you good service at all times.

"Be sure to pay your poll tax and vote in this year's elections," concluded Mr. Johnston.

Price Daniel Is Candidate for U. S. Senator

The political news of the week in Texas is that Senator Tom Connally has an aggressive opponent after 18 years in the Senate. He is Price Daniel, present Attorney General of Texas who has made a great record in office.

Daniel made his announcement Monday from Dallas.

Sunday visitors in the J. A. Williams home were: Mr. and Mrs. Luther G. Roberts of Clovis, N. M.; Mr. and Mrs. Bob Anthony of Clovis, N. M.; Mr. and Mrs. M. F. Fields of Amarillo; Mr. and Mrs. R. L. Yager of Amarillo; and Mr. and Mrs. Dale Williams and little daughter, Alicia, of Amarillo.

Report by Water Board Is Alarm Note for Plains

A mechanical device brought water to the high plains in quantity about a half-century ago. Now there is widespread alarm that a mechanical device might deplete the water supply of this same area.

Much progress has been made since the first windmills were installed on the plains. Now there are huge irrigation pumps powered by various kinds of motors. These pumps take the water from its underground lake at the rate of several hundred gallons per minute.

Recently the Texas Board of Water Engineers made public some alarming figures about the terrific drop in the underground supply of water in this area.

During the 13 years between 1938 and 1951 the underground water table dropped as much as 40 feet in some places. This maximum drop of 40 feet was reported as having occurred in .17 per cent of the 500 wells surveyed by the Texas Board of Water Engineers.

This alarming drop in the water table is, for the most part, the result of dry years when there is a great amount of irrigation. The report said that when precipitation was high and the irrigation pumps used very little the water table rose sharply in the wells observed.

The first readings in these 500 wells which were observed were taken in the spring time before irrigation pumping began.

The area that created the most alarm was that in which many irrigation wells were being operated. The ones the report mentioned were Lubbock, Littlefield, Plainview, Muleshoe, and Hereford.

The area with the major decline was reported as being located between Plainview and Floydada. There was also an alarming drop in our own vicinity. The area north of town showed a drop of 30 feet or more in some places.

This report by the water board stands as a warning as well as a question. The question is, "Will the industry that made the plains, also break the plains?"

Shamrock Man Grows Fuzz

G. L. HARRISON

G. L. Harrison, Chief Fuzzer of Shamrock's Donegal Club, shows fellow Irishmen what a real donegal looks like. All males of the Irish city, between the ages of "capability and incapability" have been asked to cultivate donegals—beards typical of the sons of the "auld country." Purpose: to publicize Shamrock's St. Patrick's Day Celebration, March 17.

Stork Specials

Dr. and Mrs. Colbert C. Held, 612 N. 14th St., Lincoln, Nebr., are the parents of a baby girl, Melinda Ann. She was born in Lincoln on January 13. Dr. Held was formerly head of the Geography Department at West Texas State College and is now at the University of Nebraska.

Mr. and Mrs. Golden Currie are the parents of a baby boy born on January 18 in the Northwest Texas Hospital in Amarillo.

MARRIAGE LICENSE

Billy Jack Gay and Bettye Kathryn McDonald, January 14.

Darold Winston Roberson and Alice Maxine Tyson, January 17.

Richard Lavine Henry and Carol Reikofski, January 18.

Roger Raymond Kayser and Lavonne McLain, January 19.

BROTHER DIES

J. W. Shook was called to Pearl, Texas, Monday by the death of his only surviving brother, W. A. Shook.

Mr. and Mrs. Shook attended the funeral and will return home the latter part of the week.

Arthur C. Haley, Jr. has been sick at his home, 1200 Seventh, since Saturday. He was able to come to The News office this morning.

Mr. and Mrs. W. A. Warren are in Fort Worth this week at the dry goods market.

EDITORIAL COMMENTS

A Few Observations As The Days Roll By

The trouble with Estes Kefauver as the Democratic candidate for President would be that few people know how to spell his name, and fewer would know exactly how it is pronounced. We have heard various twists put on the pronunciation, and are never sure that we have spelled the name correctly.

Furthermore, we do not like the idea of the proposed candidate having to run to the President for his blessings. Of course it is assumed that the Senator feels under so much obligation to the chief that he would hardly dare oppose him. This being the case, why should the people go to the trouble to elect any candidate for president, except Harry Truman?

Which leads to further speculation. A few months ago the President announced that he knew what he was going to do politically in 1952, but was telling no one—not a single soul knew his mind—so Truman said.

Throughout the months he has kept the people in the dark, one day being an avowed candidate, while the next day he was far off base. Naturally that is a pretty safe way to keep the people fooled.

Now we are told that the President is very uncertain. Unless someone makes him pretty mad, he is certain not to run; but if he gets mad enough he will get into the political fray.

All of which leads up to one conclusion: The President wants to run, but is fearful of being whipped at the polls. The voters of America will not be fooled by the corruption which has been uncovered in the Truman administration, and Harry is beginning to find out just how mad the people are about his henchmen stealing their money—the money which they dig up under protest to pay the expenses of the war, and not to be stolen by the Truman gang.

If Truman is re-elected, you may expect more of the same thing, or much worse during the coming four years. And the President will do nothing about the situation.

More political confusion!

At long last Tom Beauchamp has announced that he will not be a candidate for re-election as Judge on the Court of Criminal Appeals. Tom has been hanging onto the political seat down in Austin for 20 years. We took a decided dislike to him for the high-handed manner in which he has operated in years past. After he reached the Court of Criminal Appeals his arrogance has increased. He has written some of the most radical decisions of this technical court.

Now if we could only get Harry Graves off this court and substitute common sense in the decisions of this court the people of Texas would be better off in the way of law enforcement.

The House of Representatives in Congress has voted a straight 10% increase in salaries for all persons in uniform. The buck privates will get a small boost while the top brass will really get an increase.

There should have been some way to help out the fellows who are being drafted away from their civilian jobs into military service. When they get back home many of them will find that their jobs are filled with little or no prospect of them getting back into employment.

We feel genuinely sorry for this large group of men. They are the ones who will be hurt in this war—which the administration still maintains is not a war.

What possesses Washington to allow the Reds to get away with murder?

Russia and her band of henchmen are bleeding us white and we are sitting idly by, shaking in our boots.

The last insult is that no one in Russia is allowed to travel except in such portions as designated, and not more than 30 miles from Moscow. That isn't bad, since few folks will go to Moscow unless there is urgent necessity, but at the same time we allow the Reds free access to the governmental secrets, reports and even press conferences of the President where all questions are asked in the open, and answers given in the open. The Reds have every avenue of information which is opened to the American people.

The administration is fearful of making the Reds mad! And when the Reds get mad at us they might start a war!

We wonder just what the Korean situation may be and how far we can go toward kicking the Reds around? No one knows, since we are handling them with kid gloves.

Winnie told Congress that he was not asking for money. No indeed, he does not want money, but he came over to get steel, which is the same thing as money. Furthermore, we have no idea just where this steel will land when it is shipped in the direction of England. Chances are that it will be diverted to either Russia or China, both of whom are good customers of the English and are gobbling up vital war materials which we ship in the direction of England.

There is nothing like continued trade with enemy nations when it comes to making a little profit. Even here in America some firms continued shipping oil and steel to the Japs just as long as they were permitted before Pearl Harbor. So why jump on poor old bankrupt England when she is trying to build up her trade at the expense of our troops in Korea? Or even the few troops which she has sent to help us?

Business is business, and profit is the thing, whether in England or in America.

One thing seems certain—so long as Churchill is in power no one connected with either the British or American government will be foolish enough to give to Russia any more atomic secrets which she has not already stolen through the aid of silly Americans. Churchill plead that American troops assist the British in the Suez area, and the French against the Chinese Reds. While he put up a good plea for mutual aid, wonder just how much assistance we are getting from the British and French in Korea? Not much, we judge, as we see the money being poured out in England to carry on the Socialistic ideas; and the fact that the big boys in France are refusing to pay any kind of axes for the support of their government.

Confusion in government continues.

Governor Shivers made a typical political talk here

in Canyon last week without mentioning politics. That is an artful way with trained politicians.

President James P. Corsette left the bars down by complimenting the Governor for his decision to seek re-election rather than step into the tough senatorial battle.

The Governor kept in mind and held the attention of the audience to the corruption which exists in Washington. While he never mentioned the Chief Executive in Washington, he made it clear; very, very clear that he would not support such a program as advanced by Truman.

However, we could not help keep from thinking of what we had just read in a down state newspaper, and the conversation we have had with people right here on the high Plains.

An 80-year-old farmer put it this way: "My grandfather always voted the Democratic ticket; my father followed him in voting the Democratic ticket; and I have always voted the ticket straight. The Democrats in power are no worse than the Republicans, so why change?"

When we predicted in a national poll last year that Texas would continue voting Democratic, we had that very situation in mind.

Maybe voters have changed their minds. We hope so, at least.

Young voters are going to decide the issues of this campaign year.

While it is true that there are more young Democrats than young Republicans due to the fact that the Democrats have been in power for 20 years, we find a more independent attitude on the part of youth to vote for the man rather than follow the party.

That is the very thing which may defeat Senator Tom Connally. We talked the other day with two trained observers who had seen a lot of Senator Connally during his stay in Texas. They pictured him as a man in his dotage, and completely unfit to represent the people of Texas. He has been too close to the administration to suit these two observers.

However, let it be remembered that Connally pulled a fast one on his youthful adversaries by demanding that the tidelands bill be sent to the floor of the Senate without committee recommendation. This is a clear slap at the President and a rebuke to the brass in Washington who are determined to rob the people of Texas and the other states of the union from their individual rights.

Randall county gained the questionable honor of being the second in the Panhandle in the number of highway deaths so far in 1952. Potter county stands first with 14 deaths; while Randall stands second with 8 deaths.

If eight Randall county boys had been killed in Korea since January 1st the people would be up in arms. We are taking these highway deaths as a matter of course.

Too many folks are saying that most of these deaths are transients who are passing this way and were caught in our heavy traffic.

Which leads up to the outbreak of protests against the new liability and inspection laws, especially the latter. Talked to a garage man the other day who handles many of the car wrecks on the highways of Randall county. According to his statement two factors contribute to a majority of the car wrecks—fast driving and liquor. If governors were placed on cars to hold down speed and if drivers would not drink most of the accidents would be eliminated.

It still holds true that in the ambition to make driving safe, the legislature has probably overstepped its rights in passing such a severe inspection law. When drivers of new cars, just out of the factory, find that their new machines are defective under the eyes of the Texas inspectors, there is either something wrong with the manufacturers or with the law of the state. We note that according to "Letters from the people" which are published in many of the big daily newspapers, most of the protests are against the inspection requirements. There is not so much opposition to the liability law, as most people realize that the driver of a car, or the person who carries a gun, should be responsible for the results of their acts.

Throughout these letters is a threat against law makers who supported the inspection bill. Maybe the temper of the people will cool off somewhat, or it may continue to flare up in spite of the fact that inspection dates were postponed.

Down in Austin there is a great protest against the proposal of the President to monkey with the Internal Revenue Department. Austin people are fearful that the office there will be closed.

Yet there is never a murmur on the part of Austin people as department after department of Texas is picked up and moved to that fair city. There is no protest when state government is more and more centered in Austin, rather than scattered over the state.

We told a group of visitors at the Chamber of Commerce banquet the other night part of the requirement of doing business with the State of Texas, and the handicaps which were imposed upon institutions scattered throughout the state. The visitors were amazed. They knew nothing about the changes made in the law which forced most of the business of these institutions to be transacted in Austin, with Austin firms, and by Austin people.

The Internal Revenue Department is a part of Uncle Sam's business, and if the people of Texas can be served better in some other town, it will be too bad for Austin.

Usually, the village gossip has little in life to enjoy, otherwise she would be living her own life and enjoying it rather than living the lives of others.

Taxes are much higher this year than last and, when you are paying yours, think of Stalin, who did much to make them necessary.

And then there was the little boy who was disappointed at Christmas time because he didn't receive an atomic-powered submarine.

Every minority group has the right to live and enjoy freedoms but no group has the right to force itself upon other people.

The great trouble with luck is that it often disappears when you need it most.

The first fruit of a religious personality is an honest life.

The so-called vested interests are not always to be identified with business enterprises.

OLD BILLS ALMANAC JANUARY

FORECAST: SNOW FOLLOWED BY STRONG MEN WITH SHOVELS.

Style note: There'll be little change in men's pockets this year.

- 20—First basketball game played, 1892.
- 21—Carrie Nation starts campaign, 1907.
- 22—Anzio beachhead established, 1944.
- 23—United Mine Workers formed, 1890.
- 24—California Gold Rush begins, 1848.
- 25—First trans-U.S. telephone call made, 1915.
- 26—First A.E.F. of World War II lands in Ireland, 1942.

WHO KNOWS

1. How many miles of railroads are there in the U. S.?
 2. What is the difference between an island and an atoll?
 3. Why do some villages in Southern Russia have German names?
 4. What is an excise tax?
 5. When did the U. S. have its first income tax?

Air Force Opened To College Students

Interviews will be given on West Texas State College campus January 25, to young male students interested in a career as a flying officer in the United States Air Force.

An Air Force Officer Examining Team, composed of Capt. Jessie C. Dehay, and Capt. Jack L. Curry will establish headquarters on the first floor of the Administration Building during the hours 9:00 a. m. and 5:00 p. m. January 25th, for the purpose of explaining career opportunities, assist those interested in filling out application forms, and give qualifying examinations to those seeking Aviation Cadet Pilot or Navigator training. To be eligible, men must be single citizens between the ages of 20 and 26½. They must have completed 2 years or more of College (60 credit hours or 90 quarter hours) and meet high physical and moral qualifications.

BOYCE HOUSE

Believe-it-or-nots of American political history (as given in Champ Clark's autobiography):

Daniel Webster served in the House of Representatives from New Hampshire and in the Senate from Massachusetts.

James Hamilton Lewis was a Congressman from Washington and a Senator from Illinois.

"Sunset" Cox served eight years in the House from Ohio, then many years in the House from New York.

Clinton was governor of New York 22 years.

A former President of the United States served a short time in the Confederate Congress. He was Tyler.

Edward Everett served four terms as governor of Massachusetts and was defeated for a fifth term by one vote! This defeat eliminated him as a Presidential contender.

He was offered a presidency, however—of the Greek republic.

Everett, a scholarly man and accounted a great orator, is mainly remembered because he made a two hour speech which nobody remembers anything from on the same occasion that Abraham Lincoln spoke for three minutes and the world will always remember

the Gettysburg Address. A father and son once served together in the United States Senate. The elder Dodge represented Wisconsin; the son, Iowa.

A misfortune doesn't have to be a misfortune.

I knew a man who broke his finger and it didn't knit back right. It was doubled back permanently.

But did that discourage him? Not a bit. In fact, he became the best checker player in our county.

Yep. When he was about to get one of his checkers in a trap, he'd make a move with his index finger and, at the same time, he'd slide up another checker with that crooked finger.

"Sweet are the uses of adversity," as the poet feller said.

Physicist Sees A-Plants Making Power by 1955

BRECKSVILLE, O.—An atomic plant that could replace coal as a fuel in making power on a commercial scale may be in operation by 1955.

According to Dr. William L. Davidson, internationally known nuclear physicist and director of physical research at the B. F. Goodrich Research Center, an atomic power plant could open up manufacturing potentialities in remote areas of this country where the high cost of hauling in coal might prove prohibitive.

Dr. Davidson is co-author of "Applied Nuclear Physics," a book that the Soviets lifted and later reprinted in an unauthorized Russian edition, and currently is engaged in a special research project for the Atomic Energy Commission. While he cannot discuss the nature of this work, he indicated it may have far-reaching effects in the rubber industry.

The rubber company scientist said that atomic power could prove a tremendous boon to Brazil, for example, which does not have a domestic coal supply, or to Israel, where it is being considered for converting salt water into potable water.

Dr. Davidson pointed out that peacetime applications of radioactive materials are being studied throughout the country. This research, he said, is being made possible by the more than 18,000 shipments of isotopes that have gone from the AEC at Oak Ridge, Tenn., to American industry.

At B. F. Goodrich, he explained, radioactive tires are being used to determine tread wear. In another project, the company has been able to trace leaks in air-conditioning systems. Still another project culminated in the invention of a radioactive golf ball by Dr. Davidson. This "hot" ball can be located when lost in the grass merely by using a small Geiger counter, he said.

Doughnuts Were Loaded; Woman Goes to Jail Cell

VALDOSTA, Ga.—She didn't know the doughnuts were loaded—but it looked true enough to land her in the same jail with her husband.

Mrs. Raymond Shaw was arrested when she entered Lowndes County jail to visit her husband, carrying a bag of doughnuts loaded with pistol bullets, according to Sheriff J. L. Futch.

Earlier in the day, the sheriff said, Jailer Joe Brantley had taken a pistol from Guy Cooper, Shaw's cellmate. The bullets fitted the gun.

Cooper, charged with armed robbery, said his wife had smuggled in the pistol the previous day.

Doctor Says Atom Bombs Had Little Effect on Health

DURHAM, N.C.—Most of the Japanese who were A-bombed in 1945 are "perfectly normal except for a few scars," Dr. Paul G. Fillmore said at Duke University today.

At the present time the only effects are radiation cataracts of the eye, which are not a serious problem because they can be removed by a comparatively simple operation, he explained.

Dr. Fillmore, who recently returned from two years as a member of the Atomic Bomb Casualty Commission in Japan, said the Japanese people recovered from the immediate, acute effects in a period of weeks or months.

Most of the people who have developed cataracts are not seriously enough hindered to keep them from their jobs, he said.

Dr. Fillmore, now under an Atomic Energy Commission fellowship at Duke, said that ABCC is a long-term project that is continuing to look for other differences in exposed and non-exposed persons. The major divisions of the project are genetics, pediatrics, and medicine, he said, although there are many supporting surveys such as the eye investigations.

Japan's greatest medical problem, he said, is tuberculosis, which seems to be the result of crowded living conditions.

Army Regiment Contributes \$75,000 to Japan Orphanage

TOKYO—The Army's 27th "Wolfhound" Regiment has contributed \$75,000 to an orphanage in Osaka, Japan, for the support of unfortunate children.

The Wolfhound infantrymen, now fighting in Korea, adopted the Holy Family Orphanage in December, 1949, when they saw the undernourished children crowded in dilapidated and unheated barracks.

Through voluntary donations, the soldiers of this 27th Infantry Division regiment have subsidized a new home, a playground, and a camp for the orphans. The funds also have paid for food, clothing, medical treatment, and a new X-ray machine.

The four companies in the Wolfhound Regiment compete for the largest single contribution, and recently four companies raised \$1,000 each.

United States may restrict exports of cotton this season.

Driving Rules Help Motorists Up Mileage

PITTSBURGH—The average motorist can increase his mileage per gallon at least 10% and often much more by economical driving habits, according to Harry A. Bigley, Jr., chief of Gulf Oil laboratories' test drivers.

It is a lot more practical for most people to study the mileage they get as drivers than the mileage their cars get, Mr. Bigley asserts.

This conclusion is based on 15 years of exhaustive gasoline performance studies by the laboratories. In this research more than a million miles have been covered by test crews.

Economy practices developed in these experiments enable test drivers to use 10% to 20% less fuel in taking the same car over the same course under the same conditions as an average motorist.

Mr. Bigley has simplified the test crew experience into the following practical rules for everyday driving. They are given to help meet today's needs for personal and national economy:

1—Drive at a steady speed. Every time you push the pedal down you throw a step-up gasoline charge into the engine to assist the speed change. Drivers who speed-up, pass, jockey, and slow down use almost a third more gasoline.

2—Drive at a moderate speed. At 60 m.p.h. you use 25% more fuel per mile than at 30. Anyway, lab test drivers find the speedy motorist gains almost no extra time because he gets more involved in traffic entanglements.

3—In starting, accelerate moderately, going into high between 15 and 20. Jack-rabbit starts and beating the other fellow from the light is fun you pay for in needless gasoline expenditure.

4—On steep grades, shift to lower gears when speed falls below 20, and maintain speed at 20 or less, while in the lower gear. Motorists who pride themselves on taking every hill in high are asking their engines for costly, inefficient fuel use.

5—Approaching a red light, slow down gradually. Often you can gauge speed to catch the green.

6—At temperatures below 45°, use manual choke, if so equipped, for starting. Hold motor at fast idle until warm. Once underway, close choke as engine heats, since choke can use four times as much fuel as a warm engine needs.

7—In either hot or cold weather, when starting is difficult after a stall, hold pedal to the floor as this draws in maximum air to provide best starting mixture.

8—When parked, if only for a brief time, turn off the engine.

9—Avoid gasoline loss in the tank by not filling it so full the excess can spill. However, in hot weather keep tank more than half full to cut evaporation loss.

10—Keep your car in peak condition for most efficient fuel use: tune motor, flush cooling system periodically; change gear lubricants in spring and fall; clean air cleaner every 2,000 miles; change oil and lubricate every 1,000 miles; keep battery fully charged; tires properly inflated; brakes inspected against dragging.

Follow these rules conscientiously and, it is claimed, you can almost guarantee yourself a 10%, or better, reduction in your gasoline bill.

Burning Corncocks Capable Of Operating Refrigerator

NEW YORK—Did you know that you can operate a refrigerator on burning corncocks—or burning sawdust or leaves?

You could do it with "anything that gives off heat," according to W. Paul Jones, president of Servel, Inc., which makes refrigerators that are usually operated on gas, electricity or kerosene.

"The absorption principle of refrigeration which we use provides cold from heat without need for a motor and compressor," Mr. Jones pointed out. "Gas, electricity or kerosene are the fuels commonly associated with the Servel refrigerator but the same refrigerating effect could be obtained from any material that gives off heat, because the absorption method uses a refrigerant (freezing fluid) so chemically balanced that, paradoxically, it turns cold when gently heated." "All you have to do," Mr. Jones said, "is to keep the heat going and regulated, and the cold continues."

Baltimore Mayor Finds Life As Official Host Exacting

BALTIMORE—Mayor Thomas D'Alesandro sometimes asks himself if it is really worth it. He has been scratched by a lion cub, a visiting camel stepped on his foot, a snake bit him and a chimpanzee even whacked him in the eye.

All the encounters came in the line of duty while the mayor was welcoming newcomers to the Municipal Zoo or taking part in other ceremonies there.

His honor did balk once recently however. That was the time the city bought a baby gorilla. Mayor D'Alesandro kept his distance.

Italian line regaining pre-war status with new building.

Geography is Both Liability, Asset To Sugar Island

WASHINGTON, D. C.—The sugar island of Antigua—memory-haunted British colony in the Caribbean Sea—is being sweetened with hopes for a brighter future.

Blueprints are now being made detailing an extensive, low-cost housing project for the mass of Antigua's 44,000 people who were left destitute by last year's hurricanes, says the National Geographic Society.

Financed by government funds and aided by an American Point-4 grant of technical assistance, the project is being watched by the International Caribbean Commission as a possible model for other West Indian lands.

Meanwhile, the Leeward island awaits London approval of a general five-year development plan which, linked with postwar investments by private interests, is expected to broaden Antigua's one-crop economy and raise its standard of living.

Tropic Beaches

The island's climate appears to be ideal with year-round temperatures ranging from 70 to 82 degrees. Ideal, that is, until hurricane season when winds up to 150 miles an hour blow away everything not securely fastened down. Along its beautiful, palm-strewn shoreline are some of the finest beaches in the Western Hemisphere, yet the soil is generally poor for agriculture.

An east central location among West Indies islands brought early discovery by Columbus in 1493, but lack of a natural water supply delayed colonization for nearly 140 years. By the 18th century, however, British rulers had made Antigua a sugar producing center and its English Harbor an important naval base, where young Horatio Nelson served an early tour of duty.

Wrong Train Ride Causes Airman Action on Front

PHILADELPHIA—Cpl. John J. Murphy, Jr., 20, wrote his parents here about a wrong train ride that caused him to see front line action in Korea—92 days worth.

Murphy wrote that he fell asleep on a train while enroute back to his air-terminal group headquarters and woke up north of the 38th parallel. Cavalry officers refused to believe his story and he wound up in battle, a rifle in his hands.

He took part in 13 patrols and won the Combat Infantryman's Badge before being returned to his outfit, which had listed him A.W.O.L.

Army gives "multi-million-dollar" order for Garand rifle.

Draft call of 55,000 men is requested for month of February.

Marines Are Busy Seeking Candidates For 1953 Olympics

WASHINGTON—Special Services officers at Marine Corps installations across the country will soon initiate programs on their respective stations to select Leatherneck candidates for the United States' 1952 Olympics team, it was announced by Marine Corps headquarters.

The program, in keeping with the Marine Corps' standing emphasis on athletics, will begin when Olympic team hopefuls within the Marine Corps are screened first in station competition and then in All-Marine contests. Winners of the latter contest will then be entered in an Armed Forces Inter-Service Track and Field Meet to be held probably in California in June. The winner of each event will qualify directly for the final Olympic tryouts to be held at the Los Angeles Coliseum later that month. The Armed Forces athletes will be competing for Olympic billets with N.C.A.A. and A.A.U. winners, to whom qualifying positions have been limited in past years.

One person likely to retain his position on the United States team is Marine Reserve Corporal Bob Mathias, Stanford University's great athlete who won the World decathlon championship in the 1948 Olympics. Although still a student at Stanford, Corporal Mathias recently completed his first summer of training in the Marine Corps Platoon Leaders' Class at the Marine Corps Recruit Depot, San Diego, California. He is working toward a Marine Corps commission to be received when he finishes college in 1953. He is a member of the Marine Corps Inactive Reserve.

Three Breaks in Five Month Too Much; Wants New Jail

WARREN, Ohio—"If they want out, they get out. It's that simple."

These were the words of embarrassed Police Chief Manley English as he described the poor condition of the city jail. Three jailbreaks in five months caused the remark.

"The jail is so deteriorated that it's impossible to keep prisoners in it," the chief declared.

Latest escapees were two teenagers who earned freedom by removing three layers of brick with a shower drain cover. Jailed in connection with a jeep theft, they were later recaptured.

Researchers Offer Hints On Proper Male Hair Care

NEW YORK—Here's some advice to the wife who wants her husband's hair to remain as attractive and plentiful as her own.

First, don't let him wet his hair every day in the shower or douse water on it every time he combs it. Too frequent moistening of the hair removes healthful natural oils, dries the scalp and causes the hair to become lanky and lack luster.

Research scientists of Tintair recommend a thorough shampoo once or twice a week for the average man to keep it free from scales, plus vigorous massage to loosen the scalp and promote better blood circulation.

The usual husband will not pay much attention to the brushing routine that promotes hair hygiene, the scientists point out. But the vigilant little woman can remind her mate that he can stimulate his hair by repeated combing which should be gentle enough not to bruise the scalp.

Close attention should be paid to falling hair. The average rate is from 40 to 50 hairs per day for a healthy person. When hairs begin to come out in greater amounts—particularly longer hairs from the top of the scalp—a physician should be consulted to determine whether one of several simple diseases of the scalp is present, or whether some more serious organic disorder of the body is affecting the hair and scalp.

Cave Carved from Rock Houses 2 Million Champagne Bottles

ST. LOUIS—A fortress-like cave, carved out of rock and earth 50 feet below the center of this city, serves as the storehouse for 2,000,000 bottles of American champagne.

The subterranean winery, which was constructed nearly a century ago by Isaac Cook, is the shelter for champagne, still bearing his name, aging to maturity. Temperature in the block-long cavern is controlled at an even 58 to 62 degrees by an underground spring, and 12-foot walls shut out the noise and vibration of street traffic that rumbles overhead.

New Plastic Claimed Tough Enough To Withstand .45 Slug

NEW YORK—A new plastic, tough enough to stop a .45 caliber revolver bullet at 10 yards, has been announced by Libby-Owens-Ford Co. officials.

Known as plascon reinforced alkyl molding compound, the material is being studied for possible military uses, such as armorproofing and civilian uses that include service in refrigerators, washing machines and electronic devices.

Eisenhower warns that peace is not bought cheaply.

Illinois and Iowa Kiwanians Planning \$75,000 Program

CHICAGO—A unique \$75,000, five year research program on the "forgotten child," the victim of spastic paralysis, has been undertaken by the Illinois and Eastern Iowa district of Kiwanis International.

The program, as announced by Harry S. Himmel of Chicago, chairman of the district's spastic child committee, was approved at a recent meeting of the trustees of the district in the Edgewater Beach Hotel and presented to a leader training conference of presidents and secretaries of local Kiwanis Clubs.

The money will be raised at the rate of \$15,000 a year by voluntary contributions from the more than 10,000 members in 171 clubs in Illinois and eastern Iowa, Himmel said. It will be used to maintain a specially trained physician at one of the medical schools in the Chicago area to devote his full time and energy to research into the cause, prevention and treatment of spastic paralysis. No action will be taken, either to seek the physician or to make a contract with the medical school and hospitals involved, until the entire sum is pledged, Himmel said.

The program is the culmination of a ten-year interest on the part of the Illinois-Iowa district of Kiwanis in spastic paralysis. It was developed by a committee headed by Himmel and including: E. J. Ballweg of Edwardsville, Bryant E. Hadley of Springfield, Dr. H. I. Conn of Newman, Ill., Dr. C. Paul White of Kewanee, president of the Illinois State Medical Society; Dr. Harry R. Keiser and Dr. Frank P. Hammond of Chicago. Many specialists in the spastic field were consulted.

When the funds are pledged, Himmel said, the district will set up a Foundation for Research for Spastic Paralysis to carry out the program.

It is estimated that 300 to 500 spastic children are born in Illinois and eastern Iowa each year. About half of them recover spontaneously, while another group improves with care, but there is a substantial number which remains seriously handicapped.

Queer Duck, Third Reported, Turns Up in Rhode Island

PROVIDENCE, R.I.—It was undetermined whether he was a vacationist or political refugee, but Roland C. Clement, Executive Director of the Audubon Society of Rhode Island announced that a European duck was found off the shores of the state.

The bird, a ruddy sheld-duck, is native to Eastern Europe and Asia. It is a rarity in the United States, only two previous specimens having been recorded. One was found in North Carolina, the other in New Jersey.

The duck was shot by a hunter at Brock Island, 14 miles off shore.

Key Substances in Diet Affect Healing of Wounds

CHICAGO — Wounds heal faster when certain key substances are present in the diet, Dr. Martin B. Williamson, associate professor of biochemistry in the Loyola University School of Medicine, told the American Chemical Society's Chicago Section at an all-day chemical conference.

Although war wounds, accidental injuries, and surgical incisions are matters of everyday occurrence—and have been throughout history—little is known of the basic aspects of wound healing, Dr. Williamson declared.

Periodic measurements of the strength of tissue in healing wounds under conditions of controlled diet have shown that certain sulfur compounds in food are necessary for healing at a maximum rate, Dr. Williamson reported. The compounds are sulfur amino acids, which occur in the proteins of eggs, milk, wheat, corn and some other foods, he said.

The "healing index"—a number which expresses the rate of healing as measured in Dr. Williamson's research—was much greater on high protein diets than on low protein diets in tests conducted on experimental animals. The obvious explanation is that the protein is necessary for the rebuilding of the wounded area.

Flying Leathernecks Land To 'Cry of the Wild Goose'

WITH THE FIRST MARINE AIRCRAFT WING IN KOREA—New arrivals to this station are a bit startled, and hurriedly scan the skies the first time they hear the cry of the "wild goose."

This is not a natural phenomenon. Just the newest innovation to be used by flying Leathernecks of the Korea Courier, a section of R4D transport aircraft attached to the First Marine Aircraft Wing.

The "goose" horn, a Japanese bulb horn was introduced to take the place of a lot of unnecessary voice transmittal.

On approaching the field, the pilot presses his microphone switch and gives a blast on the horn. One blast requests landing instruction. Two blasts signifies the wheels and flaps are down. On the final approach the goose gives out with three blasts.

Maureen Connolly, net star, named woman athlete of year.

TRY AGAIN

A young doctor had just hung up his shingle on the Lower East Side of Manhattan when a patient appeared suffering from a very bad cold.

"Had you cure this code?" he sniffed anxiously.

The young doctor thought hard and said, "Go home, take a hot bath and then stand naked in a draft without drying yourself."

"That wild cure my code?" said the patient doubtfully.

"I didn't say that," answered the doctor. "But that will give you pneumonia, and pneumonia I know how to cure."

The Hard Way

Reader—"Dear Editor: What's the best way to find out what a woman thinks of you?"

Editor—"Marry her."

Success

"Everybody puts their nose into my business."

"Cheer up."

"I'm not growling. I manufacture handkerchiefs."

Smart Slugger

The geography teacher was quizzing her pupils on the location of our important cities. Suddenly she said, "Now, can anyone tell me where St. Louis is?"

To her utter surprise, Timmy, the dullest boy in the class raised his hand. Nodding to the boy, she said, "All right, Timmy, you may answer."

"St. Louis," Timmy announced, "is playing in New York."

Bad Hearing

Dialogue overheard in the office of a small-town eye, ear and throat specialist:

"What do I owe you for curing my deafness, young man?"

"Ten dollars."

"What's that? Twenty dollars?"

"I said \$30, ma'am."

MOST UNUSUAL!

A young woman on a suburban train looked up from her book and gasped in surprise. Perched on the shoulders of the man opposite were a pair of pigeons! The man sat calmly reading his newspaper apparently oblivious of the birds.

The girl restrained her curiosity until the train reached her station then she could restrain herself no longer.

"What in the world are those pigeons doing on your shoulder?" she asked.

The man looked up, shrugged his shoulders and replied: "Darned if I know. They got on with me at the station."

Definitions

"What is a debtor, pa?"

"A man who owes money."

"And what is a creditor?"

"The man who thinks he's going to get it."

Frank Approach

In a Chicago restaurant one woman was overheard saying to another: "Why don't you go to him in a perfectly straightforward way and lie about the whole thing?"

WHAT YE SOW . . .

From Detroit comes a story of the day when a big minister's convention and a powwow of automobile salesmen were held simultaneously in the same hotel. The salesmen were topping off a big dinner with "spiked watermelon" for dessert, but the hard-pressed waiters served it to the ministers by mistake. The maître d'hôtel was frantic when he heard of the mix-up. "That watermelon is soaked in alcohol," he moaned. "Get it away from those ministers before they run me out of town."

The waiters returned to say it was too late; the ministers were busy chewing away at the prized watermelon. "What did they say?" asked the harassed maître d'hôtel.

"How did they like it?"

"Don't know," was the reply, "but they put all the seeds in their pockets."

NOT EASY

"You know, politicians don't have it so easy."

"Why not?"

"You try straddling a fence and keeping both ears to the ground."

General McNarney to end 36-year career next month.

Plans Revealed for February Wedding

Mr. and Mrs. Ralph Wilson are announcing the engagement and approaching marriage of their daughter, Virginia, to Sgt. Carl Arends of Jacksonville, Florida. The wedding is planned for February 1.

Rotarians Hear Fellowship Talk About Their Club

The Rev. T. Winston Wilbanks spoke at Rotary Club Tuesday about the fellowship of individual Rotary Clubs and what they are doing to help each other as well as their fellow man. The material for his talk was gathered from the "Rotarian," the club's international magazine.

These gems from the "Rotarian" of 1951 included one club in which a member wrote an ode to the year of 1951. The distance in which some news can travel was portrayed by an Iowa club. The news of the practices of this Iowa club found its way into Switzerland.

The two clubs became thoroughly familiar with various needs in common and even exchanged some practices, Wilbanks said.

The same name brought two clubs together. One was the St. Albans Club in Vermont, and the other was the St. Albans Club in England. The English club sent a badge to the Vermont club. In accepting the badge the Vermont Club recorded the procedure and sent this recording to the English club in order for them to hear the program with their own ears.

The Rev. Wilbanks also pointed out some clubs right here at home that were concentrating on friendship among themselves. He explained about the trip the Helena, Arkansas, club took over to Memphis, Tennessee. The Barnsville, Ohio, club offers additional fellowship in the pattern of a family reunion.

Switching back to foreign clubs the speaker told of a Rotary celebration held in Stockholm, Sweden. The celebration was held in Sweden's oldest church and the King was present.

The speaker also mentioned clubs that gave assistance to the blind, donated to charitable organizations and helped provide Christmas toys for underprivileged children.

All of the clubs have certain obstacles but the obstacles of the clubs in India were probably the most serious. There was a recent law in India which prevented gatherings of two-dozen people or more from being served food. These clubs continued to meet in spite of the fact they couldn't enjoy luncheon at the same time.

One of the oddest notes hit by the speaker concerned the Rotary Club at Jamestown, Rhode Island. This club prepares and serves its own meals. According to the report, this procedure goes over big in Jamestown.

Upon completing his talk Rev. Wilbanks asked Rotary members to make comments upon what they had noticed from reading the magazine. Holmes Ambrose mentioned seeing a recent world map showing Rotary Clubs in other countries. The map showed Rotary Clubs all over the world except in Russia, Mr. Ambrose pointed out.

A new member was presented to the club by W. H. Upchurch. The new member was Grady Persons, a former Rotarian who came back as a new member.

There were four visiting Rotarians present. These were Lester W. Cones of Hereford; E. Jobe, J. J. Sanders and Bill Griggs of Amarillo. Howard Nichols, a visitor, was also present.

Annual Choir Clinic Workshop Held at WTSC

Approximately 700 high school students and about 40 vocal directors and teachers attended the annual Choir Clinic Workshop at West Texas State College Saturday, said Houston Bright, head of WTSC Music Department.

The annual affair is sponsored by West Texas State College and the Texas Interscholastic League. Those who attended were from the area to the north and region number one, Mr. Bright explained.

Dr. James P. Cornette, president of West Texas State College, welcomed the group after registration was completed. Registration for those attending started at 8:15 a. m., and at 8:30 the program started. The clinic exercises were completed at 12:15.

Dr. Orville J. Borchers, Dean of the School of Music at Southern Methodist University and one of the outstanding choral directors in the southwest, was the clinic consultant. Demonstrations by Chorus and Choirs were given by the Plainview High School. This event was under the direction of Mildred Carver.

A girls ensemble called the 'blue notes' from Floydada, performed under the direction of Nancy Lee Bevil. The Borger High School choir rendered a selection under the direction of J. Fryhoyer. And the Pampa High School choir performed under the direction of Kenneth Baumgardner.

Following the selections the vocal directors held a meeting in the Blue Room of the college cafeteria. This meeting was at 12:30, and the directors enjoyed a round table discussion, criticized the various performances and had luncheon. Procedures for the discussion were directed by Dr. Borchers.

FOR SALE: Bath tubs, cast iron and pressed steel. Laboratories and commodore. Cunningham Appliance Maytag Company. 32tf

FOR SALE: 40 head of weaner pigs. See Alfred Bellah. Phone 580 or 380. 38tf

Nature Depends Upon Precisions Of Adjustments

WASHINGTON, D. C. — Mother Earth is a precisely adjusted machine.

The physical phenomena of nature, amid which man lives and upon which life depends, often themselves depend on precisions of adjustment that might baffle the best watchmakers. This is particularly true of weather, where profound changes may result from nearly unmeasurable differences in adjustments. Since 1852 the Smithsonian Institution has issued at intervals—as measurements became more exact and extended to new fields—officially accepted Meteorological Tables giving values for all the constants of nature that have a part in the determination of weather phenomena. The latest edition has just been published, with changes and additions resulting from two decades of intensive research all over the world. The tables were prepared by Robert J. List, of the U. S. Weather Bureau. Throughout the work a Weather Bureau steering committee served as advisers. Preparation of the tables was under the general supervision of L. B. Aldrich, director of the Smithsonian Institution's Astrophysical Observatory, whose work is concerned with precise observations of radiation from the sun reaching the outer limits of the atmosphere and penetrating it to the surface of the earth.

Data Important

Some of the new data have assumed great importance. The upper atmosphere, for example, was virtually unknown when the last tables were published. In the interval it has been probed extensively with a variety of instruments—radio beams, automatically recording instruments attached to pilotless balloons, and lately with rockets. The region has been found to be a weather factory of outstanding importance, a better understanding of which now is essential.

This region of atmosphere, so thin as to be almost nonexistent, is theoretically a very hot place. Tentative temperature values are given in the tables. At an altitude of 120 kilometers, about 72 miles, there is a probable maximum temperature of approximately 520 degrees Fahrenheit. At ground level the maximum temperature probably experienced on earth is around 115 degrees F. At 11 kilometers, about 6 1/2 miles, the maximum falls to well below zero, but at an altitude of about 30 miles it rises to a maximum of close to 220 degrees F. These figures necessarily are tentative, depending partly on actual measurements and partly on deductions. Owing to the thinness of the upper atmosphere the actual temperature sensations of a human being—assuming that by some miracle he could remain alive in such a rarefied realm—remain quite debatable.

New Method

Tables in the past have stated the total solar radiation falling upon the outer edge of the earth's atmosphere. Now this is computed in terms of the amount of radiation in different wavelength bands from the invisible infrared through the visible spectrum of light and then through the invisible ultraviolet.

Of interest also are latest values for some of the more familiar physical constants, such as the weight of air as it changes with temperature and pressure.

The new tables comprise a book of 527 pages.

1951 Reported Healthiest On Record for Americans

NEW YORK, N. Y. — The year 1951 promises to be one of the healthiest on record for Americans, according to the experience among the industrial policyholders of the Metropolitan Life Insurance Company during the first nine months. The death rate was 6.58 per 1,000, only slightly higher than the all-time record low of 6.40 for the like period of 1950.

The small rise from the 1950 figure reflects the epidemic of respiratory disease earlier in the year and the losses in Korea, the company's statisticians report. In three months—January, June, and September—new minimum death rates were established this year.

The death rate from enemy action in the first nine months of the current year was 5.9 per 100,000 policyholders, compared with 4.1 per 100,000 in the comparable period of 1942, the first year of our participation in World War II.

Call to Service Amounts To Change of Clothes Only

BERKELEY, Calif. — John H. Kilbuck was recently called into the armed service, but it turned out that the call meant little more than a change of clothes.

Kilbuck was a civilian doing important research on dehydrated foods at the University of California experiment station. Although much dehydrated foods are sent overseas, Kilbuck was called into active service with the navy.

After checking his qualifications, what did the navy do with him? He's back at the same old job at the University, doing the same thing.

Religion Rates High In War-Torn Korea, Chaplain Reports

ST. LOUIS—United Nation troops fighting in the "mud, filth, dirt and ice" of Korea now can hold "anything and everything sent against them" according to Chaplain (Major) John W. Grapatin, Missouri Synod Lutheran Chaplain now home from the Korean front.

World War II veteran Chaplain Grapatin, in civilian clothes for the first time in 18 months said he was "glad to get back and I don't mean maybe" as he visited the Lutheran Building in St. Louis, headquarters for The Lutheran Church-Missouri Synod.

Called to Korea from his post in Japan with the occupational forces, Grapatin arrived in time to take part in the famous Inchon landing.

Grapatin was also in the withdrawal from Hungnam with the Thirty-second Regiment, Seventh Infantry Division.

"It was after Hungnam that the morale of the men actually improved," Major Grapatin commented. "Then they knew this was not the weekend war they once considered it to be."

Religious well-being is at a high for the troops whose church attendance ebbed during the Japanese occupation the chaplain added. "The day we took Seoul I held services on a hill overlooking the city. Although there was only an hour's notice, men walked miles to attend the service."

"There are Christians in Korea," stated Grapatin. "I had one of my greatest thrills at a service for G.I.s to which we invited interested Koreans. They couldn't understand what I preached, but when my men began to sing 'Rock of Ages' the Koreans recognized the melody and sung the same hymn in their own language."

"Their eyes watered with joy because they had found fellow Christians," the chaplain related, "and that wasn't just sweat running down my cheeks either."

Grapatin has now been assigned to Camp Chaffee, near Fort Smith, Arkansas. His wife and three daughters live in Fort Smith.

When asked to compare the two wars in which he served on the front lines, the 44 year old minister replied: "The lay of the land in Korea makes the fighting much rougher than any I saw in my two years in Europe and North Africa."

Shoeless Youngster Claims First Deer of Season

PITTSBURGH—A 14-year old, who didn't even bother to put on his shoes, laid claim to killing the first deer when the Pennsylvania season opened recently.

Thomas Wilson, of nearby Coraopolis, looked out his bedroom window on the first morning of the 11-day season and spotted an eight-point buck. He jumped into his trousers, picked up his rifle and ran barefoot into the yard to bring the deer down with one well-aimed shot.

Thomas was a few minutes late for school, but he didn't get a reprimand. In fact, he explained to the class how it felt to be a successful hunter.

Wildlife Professor Says Teeth Tell Age of Deer

STATE COLLEGE, Pa.—Hunters interested in knowing the age of the deer they bagged during the season can learn it by a study of the animal's teeth.

Dr. P. F. English, professor of wildlife management at the Pennsylvania State College, points out that contrary to popular belief, the number of points has nothing to do with the age of a buck.

Dr. English adds that telling age by the teeth is a complicated matter, probably too complicated for most nimrods. It must be done by judging the degree to which the teeth have been worn down by use.

Many persons have false ideas about wildlife, Dr. English explains, and they range from the methods of telling the age of deer to telling the age of a rattlesnake, which incidentally, has nothing to do with the number of rattles he carries.

Dr. English points out that while the skunk is a relatively small animal, he's afraid of practically no other animal. Great horned owls, traps, and automobiles are probably his only harmful enemies. Dr. English says, reminding that the skunk is in a unique position to command the respect of all who cross his path.

Small Boy Holds Rabid Fox Until It's Killed By Mother

GILDINGS, Tex. — An 11-year old, Tommy Stevenson, grabbed and held a rabid fox until his mother and grandmother could kill it with an ice pick near here recently.

Tommy saw the fox in the front yard and ran outside, fearing it would attack a younger brother playing in the yard. Instead, it turned on him. He grabbed and hung on until the two women, Mrs. Wade Stevenson and Mrs. Lilly Sanders, killed the animal.

The lad was scratched but was not bitten. Doctors began rabies shots after the state health department reported that the fox was rabid.

Hereford Couple To Face Charge Of Robbery Here

Mr. and Mrs. Calvin Young, a Hereford couple recently indicted by a Randall County grand jury for robbery by assault, were being held separately in Hereford and Potter county jails early this week, announced County Attorney D. E. (Gene) McGlasson.

Each of the accused persons is being held on a \$2,000 bond.

The alleged offense occurred December 29, about a mile northwest of town. Kenneth Landers, 23 years old, and also of Hereford, said the couple took \$10 from him. After taking the money the couple took Landers back to Hereford, he

reported. He immediately contacted the sheriff there. The Youngs were picked up and held by Hereford authorities who turned them over to Randall County officials.

Both Landers and Mrs. Young signed a written statement to the effect of the incident.

Mr. and Mrs. Young are the parents of two children. The oldest is 3 years of age and the youngest is 7 months old. The welfare office in Hereford recently took the two children to Mrs. Young's parents who live in Paris, Texas.

No announcement was made as to the date the pair would come to trial.

Membership in the U. S. veterans groups at post-war low.

Radioisotope Tags Insects As Aid in Control of Flies

Radioactive phosphorus from the Oak Ridge laboratory of the Atomic energy commission is aiding research on insect pests, the U. S. department of agriculture reports. A first field test of the "tagging" of insects with radioactive material developed information of practical value, and also showed that radio isotopes can make much easier and more definite essential studies of the flight range and distribution of insects.

Preliminary experiments explored ways of "tagging" insects. In Oregon, federal and state entomologists devised two ways of getting the radioactive phosphorus into the bodies of flies and mosquitoes reared in the laboratory. The first practical application was the release near Corvallis, Ore., of groups of thousands of tagged flies. This was followed by recoveries in baited traps set in various directions and at varying distances.

The "tagged" insects included houseflies and two common species of blowflies. The scientists found it relatively quick and easy to go over the catches with a device that registers radioactivity and so identify the radioactive flies. Houseflies were trapped in all directions and at distances up to 12 miles.

These results may prove of practical value in fly control. Since entomologists have learned that some strains of flies have developed resistance to DDT poisoning, they have wanted more information as to how far resistant flies were likely to spread. The 12-mile flights revealed by this first "tagging" experiment show that resistance is likely to spread widely as resistant breeders scatter into areas where DDT has destroyed non-resistant flies.

Reliable information as to flight of mosquitoes is wanted as an aid in establishing the size of control zones for protection either by poisoning or by drainage. Another field in which entomologists need more exact knowledge than they have is on flight of blowflies.

New Drug Fails to Stop Tropical Animal Disease

They said it might become one of the most spectacular drugs of all time—a drug that would enable farm animals to live and stay healthy in insect-ridden tropical areas.

That's the way "antrycide" shaped up when British scientists first tested it as an injectable medicine for preventing trypanosomiasis, a deadly blood disease caused by microscopic parasites. These parasites are spread from animal to animal mainly by tsetse flies.

But the blood parasites found a way to fight the medicine, and they seem to be getting the upper hand. They have built up resistance to antrycide in the same way that flies have acquired resistance to DDT.

In one of the most recent tests, conducted by research veterinarians in East Africa, injections of the drug failed to prevent the disease in a test herd of 60 cattle kept in a fly-infested area. All but two of the cattle died of trypanosomiasis within four months.

From 1/2c to \$3750

A famous coin collector once advertised an offer of \$75 for every 1913 Liberty-head nickel sent to him. During the 1920's and 1930's it was common practice for one to look at his change to see if such a nickel turned up. Finally the public came to realize that 1913 was the year the Liberty-head design was changed by the U. S. Treasury to the buffalo pattern. Strangely enough six Liberty-head nickels with 1913 date were struck off at the mint which didn't show up in the Treasury records. The most recent exchange of one of these nickels was made for \$3750. This is a high price for a coin of 25 per cent nickel 75 per cent copper content whose intrinsic value at the time of issue was about half a cent.

Lard Exports to Cuba

United States exports of lard to Cuba last year accounted for 21 per cent of the total lard exported from this country. Shipments of United States lard to Cuba have been larger than those to any other country in each of the last three years, 1947, 1948 and 1949. Cuba imports about 95 per cent of its lard requirements and, during the period 1939-1948, about 95 per cent of these imports came from the United States. In addition to providing an outstanding market for lard, Cubans are also important purchasers of other pork products from the United States.

Riboflavin in Milk

Keeping milk covered while heating helps save riboflavin, an important B-vitamin. Riboflavin is destroyed easily by light and this destruction is hastened by heat. Tests show that milk boiled in the light lost considerable riboflavin but milk boiled in the dark lost very little. It is important for the housewife to take every precaution against losses of this vitamin in milk, because milk is the food on which children and adults depend for most of the riboflavin they need for best health.

Plastic clothing for combat infantrymen undergoes test.

THE PUBLIC PAYS

A short while after his marriage late in life, to the Baroness de Reuter, eccentric publisher James Gordon Bennett received a bill from his wife's milliner. One look at the staggering amount was enough to make him see red. Marching into his wife's room, he showed her the bill and demanded:

"Did you order all these hats?" She nodded her head. Bennett, furious, stared at her helplessly. Then slowly he turned and walked away, muttering to himself:

"Someone's going to pay for this. Someone's going to pay for this." Suddenly an idea struck him. Summoning the manager of his newspaper, he ordered the price of the sheet to be raised a penny.

Putting His Foot In It

The old engineer pulled his engine up to the water tank and briefed the new fireman, who got up on the tender and brought the spout down all right. However, the new fireman caught his foot in the chain and stepped into the tank.

The engineer watched with a jaundiced eye as the new man floundered around in the water. "Just fill the tank with water, sonny," he said. "No need to stamp it down."

We're Not Bad

The guys who think our jokes are rough

Would quickly change their views if they'd compare the ones they read with those we're scared to use.

Salt and Pepper

The only good thing that can be said about some of our roads is that when riding on them it is never necessary to knock the ashes off a cigar.

Considerate

Nature couldn't make us perfect, so she did the next best thing; she made us blind to our faults.

LEND-LEASE

At a national Sunday school convention in New York, answers were given to the roll call by states. When the state of Texas was called, a brawny specimen of southern manhood stepped out into the aisle, and with a strident voice exclaimed:

"We represent the great state of Texas. The first white woman born in Texas is still living. She now has a population of over three million."

There was a pause of bewilderment for a moment, and then a voice from the galleries rang out clear and distinct:

"Send that woman out to Wyoming. We need her!"

Often Prone

There's only one thing standing in the way of faster driving, now: Pedestrians.

ETIQUETTE

A spinster was shocked at the language used by workmen repairing cables near her home, so she wrote to the company that owned the cables. The manager immediately asked the foreman on the job to make a report and here's what the foreman said:

"Me and Spike Williams were on this job. I was up the pole and accidentally let the hot lead fall on Spike—and it went down his neck. Then Spike looked up at me and said: 'Really, Harry, you must be more careful.'"

PRICE OF PEACE

"What I can't understand," remarked a plain citizen, "is if this congressman is as unpopular and obnoxious to everyone as the newspapers claim, how can he get so many concessions from the House?"

"That's easy," spoke up another. "Suppose you're in business, and have a lot of important things to do, and a man comes in and sits down beside you and begins to file a saw. Wouldn't you give him anything he wanted?"

Caldwell reports nation more ready than ever for attack.

News In Canyon 25 Years Ago

(Taken from the files of
The Canyon News of
January 20, 1927)

Responding to an invitation from President J. A. Hill, representatives from Amarillo, Plainview, Hereford, Dimmitt and Canyon Chambers of Commerce attended a meeting here to discuss the needs of the college and plan for future development.

J. W. Jennings has discovered hog cholera on a farm near Canyon.

The Post Office Department closed the post office at Umbarger Saturday, with most of the patrons receiving their mail through Canyon.

An intensive campaign to inform the voters of the need of a new ward school building has been started. The election on the \$65,000 bond issue will be held Feb. 3.

Perry Wilson downed 70 cups of coffee in Amarillo to win the championship of the Panhandle. He will train in Colorado for his next contest with a goal set for 125 cups in 8 hours.

Dr. J. A. Hill announced that he had made 60 speeches during the past year, largely to school groups and persons interested in educational matters.

Kefauver says country has had "much corruption within."

Cattle raisers warned of crash due to U. S. livestock surplus.

Stop Taking Harsh Drugs for Constipation

End Chronic Dosing! Regain Normal
Regularity This All-Vegetable Way!

Taking harsh drugs for constipation can punish you brutally! Their cramps and griping disrupt normal bowel action, make you feel in need of repeated dosing.

When you occasionally feel constipated, get gentle but sure relief. Take Dr. Caldwell's Senna Laxative contained in Syrup Pepsin. It's all-vegetable. No salts, no harsh drugs. Dr. Caldwell's contains an extract of Senna, oldest and one of the finest natural laxatives known to medicine.

Dr. Caldwell's Senna Laxative tastes good, acts mildly, brings thorough relief comfortably. Helps you get regular, ends chronic dosing. Even relieves stomach sourness that constipation often brings.

THE AMERICAN WAY

The One And Only Needed Control

HERO AT 15, REJOINS

Detroit, Mich. — Using a false birth certificate, Leslie T. May enlisted in the Army in 1948. By the time he was 15, he was a corporal and in combat at Kaesong in Korea. He was wounded and won the Silver Star. His elder brother obtained his release a year ago but Leslie has not been happy since. Reaching 17 last month, he re-enlisted on the second leg of what he's planning as a 20-year hitch in the Army.

NEW INTERCEPTORS

The Air Force is beginning to build a new interceptor fleet in which all fighter planes—instead of only a few—will have electronic eyes for hunting enemy bombers in any kind of weather, day or night. The move toward a complete all-weather defense force, begun sometime ago, is being accelerated.

BUGLERS REPLACE BELLS

Coral Gables, Fla. — When fire damaged the bell system of the Ponce de Leon Junior High School, authorities "drafted" four young students from the school band. Every 45 minutes Bob Staver, Jim Crowder, Rudy Eckman and Dennis Jarvis blew their bugles to signal time for class changes.

Help Keep Canyon Clean!

MAN SAVED FROM WELL

Pendleton, Ore. — While Norman V. Ford and his son, Leon, 18, were digging a well in the backyard of their home, the walls caved in, trapping the father. Rescuers, some of whom worked 18 hours in subfreezing weather, succeeded in bringing the 51-year-old man to the surface. For the last hour, rescuers dug with small shovels and their hands to free the trapped man's feet, one of which was caught under a plank.

FOOLED HIM

Madison, Wis. — Explaining the reason for his colliding with the car ahead, a masculine motorist said the woman driver signaled for a left turn — so he started to pass her. "She was the first woman driver I ever saw who turned in the same direction she signaled," he told police.

EVERYTHING'S UP

Helena, Mont. — Everything's up in price — even the cost of grazing animals. Ranchers will have to pay 40 cents per animal this year for grazing on some 4,100,000 acres under lease, a jump of 25 per cent over last year.

Holland may become center of European tool making.

Dulles says Japanese obligated to help against aggression.

The Answers . . .

1. Approximately 236,850.
2. An island is land surrounded by water; an atoll is an irregular formation, surrounding a body of water known as a lagoon, and the whole is surrounded by the ocean.
3. They were settled by Teutons about 200 years ago.
4. One imposed on products made and consumed within the country.
5. In 1861.
6. No; each State proclaims its own holidays.
7. Off Mindanao, in the Philippine group, about 35,000 feet.
8. Borneo.
9. The ship.
10. Chicago.

ACTIVE AT 100

Chicago. — Although Christian Sachtleben recently celebrated his 100th birthday, he is apparently in good health, sweeps the sidewalks in front of his home and often shovels snow off the porch.

Buy, Build, Live in Canyon!

Local Boys Are Registered for Military Service

According to the 4-county draft board at Hereford, 28 boys reached the age of 18 years during November and December, registering for military service.

Those registering from Randall county were: Albert Sparks, Henry Thomas Lloyd, Truman Carl Laughery, and Edd Westbrook Allen.

MAN WEDS "SISTER"

North Bergen, N. J. — George Harold Wickham, 58, and Miss Isabel Wickham, 51, whom his parents adopted more than 40 years ago, were recently married. The couple, who admit they've been in love for 30 years, have lived in the same house since Miss Wickham was adopted.

Canada is flooded by smuggled cigarettes from U. S.

Wayside Items

A number from Wayside attended the Tulia Basketball Tournament Saturday night at Tulia.

The Home Demonstration Club met in the Floyd Adams home January 17 for an all day affair.

FIRST PIANO QUARTET
will appear at the Amarillo Auditorium February 5 under the auspices of Dolly Lynch. Tickets may be secured through Mrs. Frank Kimbrough of Canyon, phone 58-W; or mail orders to Box 783, Amarillo, or call 3-4995, Amarillo.

with a covered dish luncheon at noon. Mrs. Ruth Stephenson of the Fairview club gave a talk on crafts. The Agent, Miss Pauline Cumpston, was present. Others present were Mesdames Bill Heister, and Frances, Alvin Moudy and Jr., H. T. Duke and Jorja, Gordon Foster and Paula, Bill Allen and Gary, Wyatt Heister, Jack Foster, Guy Watson, B. L. Newby, Roy Dodson, David Rae, Chas. Kennedy, Melton McGehee, Henry Hamblen, W. R. Franklin, and the hostess, Mrs. Floyd Adams, and one visitor, Mrs. John Bible.

Next meeting will be February 7 with Mrs. Bill Allen. The subject for study is Lamp Shades. Each member is to make a shade.

Mr. and Mrs. J. R. Stockett made a business trip to Panhandle Saturday.

Mrs. Bill Thurman had surgery in an Amarillo hospital last Friday a. m.

Miss Charlotte Adams underwent surgery in the Neblett Hospital one day last week.

The Willie Modisette family were Canyon callers Saturday.

The Chas. Kennedy family were in Canyon Saturday.

John McGehee is getting ready to build a garage.

The Glenn Mahler family of near Borger spent the week-end in the E. J. Mahler home.

Mr. and Mrs. E. J. Mahler spent

part of last week in Wichita Falls visiting relatives.

Mrs. Billy Spann visited part of last week with her people in Amarillo.

J. S. Sluder of Happy helped W. R. Franklin on his garage part of last week.

The Les Raymond family have moved to Canyon. We regret losing this good family, but hope they like their new home.

Mr. and Mrs. W. R. Franklin were dinner guests Sunday in the Roy Franklin home in Canyon.

Wayside Home Demonstration Club news as reported by Mrs. W. R. Franklin, club reporter:

B. B. Cluck Died Wednesday Morning At Austin Home

B. B. CLUCK

B. B. Cluck died at his home in Austin where he moved several years ago because of poor health.

The family came to Canyon in 1917 and operated the Star Barber Shop on the west side of the square until it was necessary for him to move away. He closed out the business at that time.

During his long residence in Canyon, all members of the family were very active in church and civic affairs.

Mr. Cluck was 65 years of age. He is survived by his wife and three daughters: Mrs. Weldon McKinney of Ardmore, Okla., Mrs. Verlin C. Massey of Austin and Mrs. Polly Powell of Austin; one brother and two sisters.

The funeral was held Thursday with burial in the Memorial Park Cemetery at Austin.

Eisenhower backers expect general to act by February 1.

Civil Service Test Offered by Post Office

Postmaster Guy Harp announced Tuesday that a civil service examination is being offered to those interested in the position of substitute mail carrier. As yet no closing date has been set on the examinations. The material which was received by the Post Office Department merely stated that applications would be accepted until the needs of the service are met.

The application form that must be filed in connection with this position is form 5000-AB. This form must be filed with the Regional Director of the 14th U. S. Civil Service Region and forms can be obtained at the Post Office. All of the information pertaining to this examination is available at the Post Office also.

All applicants must actually reside within the delivery area of the Post Office or be bona fide patrons of such office. Persons employed in the Post Office will be considered patrons of the office. The place of examination is the same as the place of employment.

General requirements include the ability to drive an automobile, be a citizen of or owe allegiance to the United States, applicants must be between the age of 18 and 50,

be at least 5 feet 4 inches in height without shoes and if a male, weigh at least 125 pounds.

The height, weight, and age requirements are waived for applicants entitled to veteran preference.

Physical requirements are quite rigid and should be checked thoroughly by the applicant before the examination is taken.

Public Asked To Heed Fire Siren

Trash and grass fires in the vicinity recently have created quite a problem for the volunteer firemen. One of these problems is getting to the scene of the fire promptly.

Early Monday morning there was a trash fire in the vicinity of 1104 5th Avenue. During the noon hour Tuesday the firemen were summoned to fight a fence fire at 2009 7th Avenue. In fact, this is the time of year when most people in the vicinity seem to expect fires and the co-operation of the public is needed to keep the loss at a minimum.

It was reported that one of the greatest obstacles in getting to the scene of a fire is a person who is driving and fails to pull his car

to the curb to let the fire truck pass.

Chief of Police Camp said in the future he would make it a point to give a ticket to the driver who ignores the fire truck siren. There

is also the driver who wants to follow the fire truck to the scene of the fire. "This is also a bad practice," the spokesman said.

Nicholas Jimmie Brown
Peter Ralph Miller
Mother Letha Sheets
Grandmother Barbara Shepherd

PENTECOSTAL HOLINESS REVIVAL POSTPONED

The revival that was to begin Monday night, January 21st, has been postponed until Monday night, January 27th.

"Rev. Vowell is in a revival at Slaton, Texas, and God is blessing in a special way there, and they felt the revival should continue for another week.

"Rev. Vowell is to be with us for two weeks beginning Monday night, January 27th, and continuing through Sunday night, February 10th.

"We want to urge both young and old to come and hear this consecrated boy preacher in sermon and song.

"Rev. Vowell comes to us with a real burden for souls, and he has a special burden for the youth. His messages will be a blessing to all.

"Come and join in the battle against sin with us at The Pentecostal Holiness Church, just one block west of the Courthouse on 5th Avenue."

Mrs. C. W. Haddock, Pastor.

1925 BRIDGE CLUB MET WITH MRS. LEONARD BRITT

The 1925 Bridge Club met with Mrs. Leonard Britt on Wednesday, January 16.

Red carnations were the center of decoration throughout the entertaining rooms.

A dessert course and coffee were served to Mesdames Ray McReynolds, Glenn Dowlen, Boone McClure, Herschel Coffee, Dudley Moore, Milton Morris, J. D. Barker, J. M. Daugherty, A. K. Knott, Bill Sternberg, Edd Reynolds, and Sidney Burgess.

BIRTHDAY DINNER HONORS RAY BURRUS SUNDAY EVE

Mr. and Mrs. Harley Burrus honored their son, Ray, with a birthday buffet dinner Sunday evening.

The birthday cake centered the table along with other delicious dishes.

Guests included: Mr. and Mrs. Ray Schultz, Mr. and Mrs. Loyd Devin, Mr. and Mrs. Lloyd Johnson, Mr. and Mrs. R. L. Glanton, Barbara and Carolyn, Billie Morton, Caraline Rogers, Evelyn Costley, the honoree, and the host and hostess.

PARK H. D. CLUB MET IN HOME OF MRS. G. A. CALLING JAN. 17

The Park Home Demonstration Club met in regular session, January 17, in the home of Mrs. G. A. Calling. Yearbooks were filled out and programs for the coming year discussed.

Those attending were: Mrs. A. L. McCandless, Mrs. L. J. Raymond, Mrs. K. Erwin, guests; and Mrs. F. Winters, Mrs. Ruggles, Mrs. L. Winters, Mrs. Herrick Simon, Mrs. Joe Turpin, Mrs. E. Winters, Mrs. D. Maynard, Mrs. Frank Simon, Mrs. O. E. Wineinger, and the hostess members.

There is little doubt about it — Texas' major problem today is the inspection of automobiles.

The last Legislature had an inspiration; it passed a law requiring that cars must come up to a certain standard, according to test, before a license tag could be issued.

The law went into effect, and according to its terms, your car would have to pass the test before you could buy your 1952 license plates.

The idea was that old cars, and cars that had not been properly cared for, would likely be hazardous on the highways. It was a

NIGHT COUGHS

remedy to use is... **VICKS VAPORUB**

A motor rewind here has its full rated horsepower — the work is superlatively done by specialists and is wholly guaranteed. Regardless of type, size, make — we can service your electric motors perfectly, economically.

Wirt Electric

good idea. The hitch came in making it work.

In the first place, it soon became apparent that it would be impossible to get all the Texas automobiles inspected before the April 1 deadline for buying new license plates.

Col. Homer Garrison, Jr., director of the Texas Department of Public Safety, threw up his hands in despair. He asked the attorney general whether it would be possible to get more time.

Attorney General Price Daniel ruled that Garrison had the authority to extend the deadline. Colonel Garrison proclaimed that the citizens could have until September 6 to get their cars inspected and to put them in condition to meet the standard required by law.

That took care of the emergency. It was not long, however, before another one arose.

Car owners found that the tests were pretty rigid, and that they would have to spend a lot of money on their automobiles to bring them up to standard.

Some parts of the test were very exacting. For example, you had to have precise front-wheel alignment before you could pass. It took money to get those wheels lined up.

You had to spend money on your brakes. You had to see that your car muffler was just so, for Colonel Garrison had ruled that you must create no hazard from carbon monoxide issuing from your exhaust.

These and other details: you had to have windshield wipers that worked, all your lights must be burning and adjusted to the required elevation.

The specifications were so precise that your lights might be in order if your car was loaded, but they would be off when the vehicle was empty.

There were differences of opinion at the various testing stations. That is to say, you would be all right if one station tested your car, but if you went to another place, you might be told that certain adjustments would have to be made before your vehicle could pass the test.

More and more citizens were objecting to the new law. There were people at the capitol who would tell you that it could not last very long.

The governor issued a press memorandum saying that extending of the inspection period would relieve much of the inconvenience, and that the Legislature would have time to change the law, if

necessary, before the license purchasing period next year.

He said if there is still great opposition to the law by the time the September 6 deadline arrives, "we will work something out."

The Wolfen Mortgage Co. to Wolfen Park, Inc., 32 acres more or less, out of the southwest portion of section 186, block no. 2, A.B. & M.

Wolfen Park, Inc. to M. O. Lawhon, lot no. 13 in block no. 93, in Wolfen Park Unit no. 6.

Durward E. Wilkinson and wife, Dorothy Gene Wilkinson, to C. D. Holloway, lot no. 15, in block "K," Broadmoor.

Clara Currie Smith and husband, Dale Smith, to Elmer Rabin and wife, Helen Rabin, all of the north 10 feet of lot no. 10, in block no. 40, Wolfen Estates.

John Shaver to C. L. Munday and Troy F. Jones, lot no. 12 in block no. 1-A, South Lawn.

Hans E. Reimers and wife, Frances Reimers, to Durward V. Payne and wife, Mary Frances Payne, all of lot no. 4 in block no. 15, Edgefield.

C. L. Munday and Troy F. Jones to John Shaver, lot no. 39 in block no. 5-B, South Lawn.

Glen McKenzie and wife, Alice May McKenzie, to Dory Funk, all of the southwest quarter of section no. 85, block 5-B, H & G.R.R. Co., save and except a 7 acre tract owned by L. R. Beadle.

Mrs. Edna R. Jett to Stuart H. Condon, Jr., and wife, Bobbye L. Condon, all of lots nos. 1 and 2 in block no. 12, Conner.

Earl G. Hamlett and wife, Sara Anne Hamlett, and Joyce S. Holbert, to L. A. Clymore and wife, Mayme Ann Clymore, lot no. 5 in block no. 6, Gables.

Home Building and Realty Co. to John Hetrick and wife, Barbara Lenere Hetrick, lot no. 5 in block no. 4, Paramount.

Bill T. Foster to Laura Hildreth, a tract of land being 90 acres, more or less, out of section no. 4, in block no. M-6, SK & K.

Home Building and Realty Co. to Carl W. Carson, lot no. 10 in block no. 1, Paramount.

G. C. Wescoat and wife, Winnie Mae Wescoat, to Charles A. Robertson, Jr., and wife, Betty M. Robertson, lot no. 5 in block no. 1, Caprock.

Charles L. Altman and wife, Grace Altman, to S. E. Weir and wife, Erlene E. Weir, lot no. 11 in block no. 33, Edgefield.

Wm. C. Schutts Construction Co. to T. F. Abbott, lot no. 6, in block no. 9, Westhaven.

Donald C. Oden and wife, Helen Marie Oden to Jake C. Woodman and wife, Mozelle I. Woodman, lot no. 20 in block no. 12, Gables.

W. C. Roberts and Juanita Roberts and Mary K. Blanton to W. R. Edwards, 3.45 acres of land out of the northwest part of the south three-fourths of section no. 31, block no. 9, B.S. & F.

10,500,000-ton rise in steel industry capacity is set for 1952.

New Method Is Producing Illinois Oil

URBANA, Ill.—More than 20 million barrels of additional oil with a value of more than \$50,000,000 have been recovered from previously abandoned Illinois oil fields as the result of water flooding oil sands. It has been reported by Dr. M. M. Leighton, chief of the state geological survey division of the state Department of Registration and Education.

The new method, which is being adopted generally throughout the rapidly expanding Illinois oil basin, was pioneered by survey scientists in 1941.

Water flooding is justified, Dr. Leighton said, because normal pumping of oil sands will recover only about one-fourth of the oil volume that was originally present.

"In other words," Dr. Leighton explains, "approximately three-fourths of the crude oil would be left in the earth if operations were abandoned after pumping proved uneconomical."

The survey chief pointed out that since 1884, a total of 468 oil fields have been discovered in Illinois and a total production of 1.5 billion barrels has been obtained. Ordinary pumping will recover much more, but water flooding will add another 600 million barrels, conservatively estimated.

Last year alone, 4.5 million barrels were produced by water flooding out of a total production of 62 million barrels for the entire state.

Dr. Leighton said that in certain fields the accumulated recovery by water flooding is already in excess of the original recovery by ordinary pumping. He cited the Patoka water flood project as an outstanding example and expressed the opinion that ultimate recovery by water flooding will be about three times what pumping alone would yield.

Predicting that recovery of this huge volume of oil will extend over many years, Dr. Leighton says that "secondary recovery operations will probably last another 50 years, possibly more. Even so, there probably will be left in the 'underground sands' several billion barrels of residual oil which cannot be recovered by known processes, but these problems will be worked out by the new petroleum engineering division of the state geological survey."

Survey scientists report that water flooding operations require careful planning and supervision on the part of the oil operator and his petroleum engineers. Of great importance is the location of an adequate supply of water for injection purposes.

Geologists emphasize the importance of pooling the interests of several operators in a single field on a "unitization" basis in order to secure a much more effective water flooding operation. Almost a dozen of the larger producing fields in the state are now unitized, the largest being the Salem field which has eight separate oil-producing formations and 9,600 productive acres.

Flood Pays Off, Says Soldier Saved from Death

WASHINGTON—"Blood saved my life."

With these four words, Corporal James Durham summed up his appreciation to some unknown blood donor.

The 19-year-old veteran of some of the toughest fighting in Korea is aware that he is living on borrowed blood. But now that he has recovered completely from his severe arm wounds, he has paid back his debt—with interest.

"Blood is better than life insurance when you are in combat," said the beribboned soldier who went into Korea with the 24th Infantry Division. "This way you live to be your own beneficiary. But, as with any insurance, someone has to pay the premiums."

"I was like a lot of other people until I got hit. I didn't realize what one pint of blood could mean to a man. Now that I have been lucky enough to learn my lesson and live to do something about it, I'm glad to pay my own way as far as the blood bank is concerned."

Corporal Durham, son of Mrs. Thomas Williams of (Westover Terrace) Knoxville, Tenn., is a good salesman, too. Not only has he given blood twice to pay back the blood which saved his life, but he also has talked several of his friends into making blood donations.

Highway Patrolman Drives Into Ditch to Miss Bus

MALIBU, Calif.—A highway patrolman recently drove his patrol car off the road at 95 miles an hour to avoid hitting a school bus that pulled out in his path as he raced after two speeding cars.

Patrolman Elmer Hoskins, 39, was chasing two cars on U.S. Highway 101 when it happened. "I remember seeing those little faces and big eyes looking out the window at me," he said, "I couldn't do anything else."

The patrol car hit a ditch, bounced and rolled. Hoskins, slightly bruised, cited the driver for failing to give right of way to an emergency vehicle.

Tight supply of wheat and corn is foreseen for early 1952.

Harry A. McDonald, named as new Administrator of the Reconstruction Finance Corporation, is put in to loosen up a little on lending policies of that big Government loan agency. There are loud complaints that it is next to impossible to get approval of loans even for defense purposes.

Organizing European defense in Paris is to seem increasingly irksome to General Eisenhower now that he is being pushed as an active aspirant for the Republican nomination. His friends figure that the General will be glad to come home not later than April 1 to jump into the political fray.

The British Prime Minister is personally responsible for the order jacking up security in Britain's atomic-energy program. Churchill thinks there's something to U. S. complaints about British laxness, in view of the way U. S. atomic secrets have in the past gotten to Russia via British scientists.

Eagles Win Tulia Tournament

Five Players Polled On All-Tournament

Winning their third tournament of this season, the Canyon Eagles won first place in the Tulia Invitational Tournament by defeating Dalhart 56 to 30. The Eaglettes, however, were less fortunate and fell to the Wolverines of Dalhart, 44 to 31.

Ratloff took the ball as Burrus got the cue on the tip-off. The Eagles had worked the ball down under the goal and Burrus racked up two points before the game was 30 seconds old. Dawdy and Hamblen came in for their share of baskets, after Burrus had started the ball rolling.

Early in the game, Guy Hamblen got the ball and dribbled all the way down the court, but missed the basket. Ritter of Dalhart fouled Burrus but he missed his free throw. Only a few seconds before the first quarter whistle sounded, Burrus made the last shot. The scoreboard read 14 to 9 in favor of the Eagles at the end of the first quarter.

At the tip-off of the second quarter, Dawdy received the ball. Scoring dropped off in the second period with only a two-point lead for the Eagles. After a short period of play, Hamblen scored for the Eagles but Dalhart had already scored so the lead remained the same. Ray Burrus got his first foul early in the second quarter. Nickel fouled Burrus, but he missed his free shot. Dalhart came up with another foul when Ritter fouled Ratloff. Burrus picked up another foul in this quarter.

In this same quarter one of the outstanding plays of the game was made. Ratloff came from behind, received a pass intended for a Dalhart player, but failed to score. Dalhart gradually closed the lead by the end of the second quarter. The first half ended with a score of 21 to 19 with the Eagles leading when the whistle sounded.

Lynn Williams received the ball. Burrus made two baskets in quick succession and stretched the Canyon lead to 10 points. Ritter fouled Ratloff, who made one of two free throws. Adding two points to the count Lynn Williams made another goal.

Bobby Langhorne was fouled by Dick Dawdy, but missed his chance. Dalhart made only one goal in the third quarter. It was shot from such excitement that no one could tell who made the goal.

Lynn Williams sank a beautiful shot from the extreme corner of the court. This was another of the excellent plays of the game. Time was running out and everyone was screaming for the Eagles to shoot, but the period ended and the Eagles didn't shoot. The Eagles accounted for 17 points during the third quarter.

In the final quarter the Eagles made 18 points, while the Wolves only made 8. The Eagles went into the quarter with a 16 point lead. Hamblen and Burrus both hit the basket. With six minutes left in the game, Burrus fouled off.

Middleton, Wimberly, Hardaway, and Cummings saw action in the fourth quarter. The game ended 56 for Canyon; 30 for the Dalhart Wolves. Starters for Canyon were Ray Burrus, Bob Ratloff, Lynn Williams, Dick Dawdy, and Guy Hamblen, while Dalhart started Billy Ritter, Doyle Carson, John Nickel, Clois Howell, and Bobby Langhorne.

Burrus led scoring honors for Canyon with 18 points. Lynn Williams, who didn't even get warmed up until the third quarter, came second with 12 points. Dick Dawdy accounted for 11 points, Guy Hamblen 7, Red Ratloff 6, and Bobby Hardaway 2.

Eaglettes Lose

Fine defensive work on the part of the guards of the Canyon and Dalhart teams was displayed effectively when the first quarter ended with a score of only 7 to 4 in favor of the Dalhart Wolverines. Canyon rotated its team around during the game which was to its advantage. With height to their advantage, the Wolverines were able to raise the score to 22-8 at half time in their favor. Peggy Bonds assumed the scoring responsibilities for Canyon by shooting midway from center of the court and Canyon's goal.

Mickey, Bonds, and Glanton exhibited outstanding aerial work during the third quarter, when they advanced the Eaglettes score by 12 points, leaving them only 8 points behind the Wolf Girls.

The fourth quarter started and ended with both the Wolverines and Eaglettes battling for scores. Aiding in Canyon's fourth quarter score was Martha McBroom, who scored two important field goals. Eaglettes making the all tournament team were Barbara Glanton, forward; La Rue Davis, and Joann Dodson, guards.

Edge Kress

The Eaglettes edged past Kress in a close game, which ended in Canyon's favor 21 to 20. Scoring honors of the game went to Peggy Bonds.

FFA Sweetheart Awarded Jacket

SHIRLEY ERWIN
... FFA Sweetheart

Shirley Erwin, senior, and FFA Sweetheart for 1951-52, was awarded a sweetheart jacket by Donnie Stroup, FFA president, in an assembly January 8. The jacket is a gift from the FFA members.

Personality, scholarship, citizenship, and a student of Canyon High School for one year are the requirements necessary to obtain this honor.

Shirley will be introduced at the Parent-Son Banquet and will be seated at the head table.

She will attend the FFA district meeting and be a delegate for the district sweetheart. If elected sweetheart of the district election she will compete in the area. By winning the area sweetheart honor she will become a delegate for the state organization sweetheart.

Shirley is completing her services as first semester editor of The Eagle's Tale. Other honors and positions held previously by her are: seventh grade Halloween Queen, member of FHA, parliamentarian for FHA 1949-50, National Honor Society 1950-51, and senior class reporter 1951-52.

March of Dimes Contributions

March of Dimes campaign in Canyon High School Friday, Jan. 18, brought in a total of \$11.13 from contributions by students. This makes a grand total of \$32.93 collected from pupils since the campaign began Friday, Jan. 11. Keep those contributions coming for This Fight Is Yours!

Dating Data

Ever wish there was something interesting to do on a date besides going to shows, going to shows, and then more shows?

Would you like to try something new for a change? Here are some suggestions for those dates that are high in fun and low in folding money.

For instance, how about a Saturday-afternoon date at the museum in your town. It may not be very interesting when you go alone but I bet you will find it great fun to have some special friend escort you there. Afterwards you could stroll over to your favorite munching stand and have hot-dogs and cokes.

When the weather is bright and you are in an adventurous mood, why not ask your special friend if he would like to explore the town. You do not know how exciting your city can be till you have seen it on foot.

For a Sunday afternoon special why not try asking your best friend friends to help pack a lunch. Then ask your dates if they would like to take a hike up a mountain, through the woods, or over the fields with you—now you are all worn out so why not stop and have lunch before you start your walk home.

Let's try one of these suggestions on your next date and see if you do not enjoy it as much as going to a movie.

FRESHMAN TEAM LOSES TO DIMMITT AND PHILLIPS

Canyon's freshman team lost to Phillips, 20-27, January 15, at Canyon. Billy McBroom was high point man for Canyon.

On January 16th the freshman team journeyed to Dimmitt where they were defeated 40-36. Leroy Burrow held high point honors with 10 points.

Buy, Build, Live in Canyon!

Walking down the halls this week, Cal noticed cough drops and Kleenex, heard one or two noiseless voices. Yep!! It's that time again when all the colds pass 'round, but don't let it get you down!! Hope you feel better soon.

Girls Attention!!!! This is leap year!! In many countries of the old world it is customary for the young maidens to propose to the young men of the town. The custom was first established in Scotland in 1288. Girls, get your man! He may be just around the corner.

No dates last week? I wonder why? Could be semester tests Have just slid by!

TESTS? Cheer up, chin up! Your days aren't through You probably did better'n You that ya cood do!

Poise is the art of lifting the eyebrows instead of the roof.

Sniffle, Sniffle, little cold. Somehow, that is getting old! Jo and Doris, Elaine and Sue, Coughing, sneezing, and sniffling too!

There is no significance in homework!!!!

Social Chairman at the John Adams High School in New York City, conducted a year long experiment with four history and economics classes. He split the classes in two. Half the students were given homework, half were not.

At the end of the year tests showed there was no significant difference in what the students had learned. Those who were not given homework knew as much about history and economics as those who were not!

Show this to your teachers!

New Books Added To School Library

Excitement and adventure prevail throughout the pages of 44 books which have recently been added to the Canyon High School Library. These novels are in constant demand and are now available to all students who wish to explore the wilds of the earth, live the exciting adventures of early pioneer days, read of first love, rub elbows with famous men and women, or venture into the realms of outer space from the comfort of an easy chair.

Popular with boys are "Our Fighting Jets" by Major C. B. Colby, "All-American" by John Tunis, and Samuel Clemens' "The Adventures of Huckleberry Finn." "The Red Badge of Courage" by Stephen Crane and Winston Churchill's "The Crisis" are also widely acclaimed.

Novels enjoyed by girls are "Winter Wheat" by Mildred Walker, "Going On Sixteen" by Betty Cavanna, and Sinclair Lewis' "Main Street" and "Arrowsmith." Three biographies have also been placed on the shelves. "Janice Meredith" is by Paul Ford; "Jane Hope" is by Elizabeth Gray, while Theodore Dreiser is the author of "Sister Carrie." "A Candle in the Mist" by Florence Means and "No Road Too Long" by Hildegarde Hawthorne are also highly recommended.

Due to the attractive and practical arrangement of our library, new novels may be located easily and should afford many hours of profitable, entertaining reading for high school students.

Four Band Queen Candidates Elected

Tysene Cox, Sherma Dixon, Nelda Ruthart, and Nora Dell Ruthart were elected as candidates for band queen. In a secret election Friday, one of the girls was selected as queen. It is a tradition of the band to keep the identity of the queen a secret until the night of the coronation.

Barbara Glanton, the queen last year, was not allowed to run for queen but will have a major part in the coronation, according to rules established by the Band Council before the election. The Band

Sarah Jane Colwell Newly Elected Editor of The Eagle's Tale Staff

SARAH COLWELL
... New Editor

Sarah Jane Colwell has been elected editor of The Eagle's Tale for the spring semester. She succeeds Shirley Erwin who has been serving as editor for the fall semester.

Lou Yarbrough replaces Ralph Green in the capacity of associate editor. Other new staff members chosen

for respective positions in the new session are: business manager, Shirley Erwin; exchange editor, Lucille Simon; feature editor, Carol Rose; news editor, Elaine Cundiff; sports editor, Ralph Green; and columnist, Ellen Jo Jennings.

The editor and associate editor are the general overseers of the newspaper department. They have supervision of the department editors and have charge of the paper's general contents.

The editor plans policies and rules for make-up, plans headline schedule, and is direct assistant to the advisor and principal. These are just a few of the responsibilities of the editorial staff.

The new editor of The Eagle's Tale has attended the Canyon Public Schools for six and a half years, having moved here from Happy at the age of nine. When asked her comment upon learning that she had been elected editor, Sarah Jane stated that she was grateful for the honor and that she would do her best to fulfill the qualifications as editor of The Eagle's Tale.

Among the recent offices and positions held by Sarah Jane include serving as secretary of the sophomore class, 1950-51; junior class reporter, cheerleader, and junior play cast, 51-52; member of FHA for three years, and a member of FTA Club.

SFC Acquires Scrapbook

An eagle and the letters 'SFC' adorn the leather hand-tooled cover of the historian's scrapbook presented to Peggy Bonds, historian, January 14. This book will be compiled for four years and placed in the library.

Committees were appointed to arrange for better parking facilities, to dust and care for the trophy cases, to take charge of the lost and found department, and to assemble the activities of the SFC in a booklet.

Anna Lou Samuelson, Ann Holt, and David Miller were appointed as the committee to work out a safer, better way of parking in the area about the school.

Carlene Rogers and Peggy Bonds are in charge of the care of the trophy cases.

The lost and found department committee consists of George Dowlen, Bettie Graham, and Norman Tucek.

Officers Elected In Science Club

At a meeting of the recently organized Science Club members elected Ralph Green to serve as president; Leroy Dickerson as vice-president; Camilla Davis, secretary, and Ted Briggs and Joe White as treasurers for the spring semester.

Other officers were also elected at this first meeting of the organization. Barbara Glanton was elected to be program chairman. Ralph Green is head of the publicity committee. For the refreshment committee, the leaders are Ted Briggs and Joe White.

Following the election, two films, "Beginning of Chemistry" and "Science and Superstition" were shown to the members. Cards with science puzzles on them were presented to the students for them to solve, after which refreshments were served.

The first Thursdays of every month has been set aside for the meeting date of the club. Time for meetings is 7 o'clock at the home of Mrs. Joseph Findley. Mrs. Findley and Jack Barnett, instructors of science at CHS, are the organizational sponsors.

This club is open to all chemistry and biology students interested in becoming a member of the organization.

Council is in charge of the election and coronation.

The coronation is a feature of the annual winter concert of the band to be presented January 31, in the high school auditorium, at 7:30 o'clock. The girls will be dressed formal for the occasion.

Nora Dell is a sophomore in the high school and plays the cornet in the marching band. Nelda and Sherma are seniors, and are twirlers in the marching band. Tysene is a junior and also a twirler in the marching band.

Silence Stressed In Fire Drills

A fire drill, held in Canyon High recently, was of little value. The buildings were cleared in two minutes, but the attention of students seemed to be in talking.

What is the purpose of fire drills?

Fire drills discipline students to clear the buildings orderly and quickly, and to teach self control in times of emergencies.

On hearing the fire signal, each student should give his complete attention to the fire and refrain from talking or pushing.

"These aims can be accomplished only when military discipline is required of all occupants. Executives, teachers, and janitors, as well as pupils, must be subject to orders and take part in the drills."

SENIOR BAKE SALE

Seniors will have a bake sale Saturday, January 26, at Bellah's Super Market. The money raised by this sale will be used to help finance the senior trip.

Golden Glovers Drop Fights in Plainview Bouts

Local Golden Glovers entrants in the bouts at Plainview included Bobby and Calvin Costley and Larry Stroupe. The Costley brothers lost their fights on split decisions and Larry Stroupe lost his on a unanimous decision. These three fighters and probably several others plan to sharpen up their boxing technique and enter the Golden Gloves bouts in Amarillo.

Equipment and gym space in the new West Texas State College Field House were acquired for the boxers by the Canyon Recreation Council. Cecil Massey said that during the training periods more than 20 boys appeared.

The boys are being trained by Don Booth and Chet Reeves. Both were Golden Gloves entrants in the Amarillo bouts last year, and are students at West Texas State.

It was announced that those who win their fights in local contests here will receive a trophy.

Joseph Stalin is on notice that, if Communists move in force into Southeast Asia from Communist China, military action against the Chinese mainland will follow. China remains vulnerable to bombing attack and blockade.

Winston Churchill did almost all the talking for Britain in recent conferences with President Truman, while the British experts kept quiet. For U. S., the experts did almost all of the talking while Mr. Truman kept quiet.

President Truman keeps in mind the experience of John Quincy Adams, who served in the Senate, then in the Presidency and then returned to service in Congress. Mr. Truman would like very much to try this year for the Senatorship from Missouri.

To Give Concert in Amarillo

FIRST PIANO QUARTET—Shown above are the four members of the internationally renowned First Piano Quartet which will present a concert in Amarillo February 5 for which tickets are on sale at Tolzien's Music Store in Amarillo. In the upper row from left to right are Adam Garner and Edward Edson; in the lower row are Frank Mittler and Glauco D'Attili.

The pianists will appear in the Amarillo City Auditorium under Dolly Lynch's auspices. Tickets can also be secured from Mrs. Frank Kimbrough of Canyon or phone 58-W, or mail orders to Box 783, Amarillo, or call 3-4995 in Amarillo.

Battleground For Two Ideas, That's Berlin

WASHINGTON, D. C.—Out on a 100-mile limb in Soviet-occupied Germany, Berlin today is a city of split personality, each side trying to talk the other down.

By loudspeaker, electric sign, radio, placard and parade, free West Berlin and the Communist Eastern Sector clash in a continual war of ideas.

The National Geographic Magazine, in an illustrated profile of "Berlin, Island in a Soviet Sea," describes what it is like to live with the Communist world just across the street.

If Washington . . .

"Imagine Washington—God forbid!—apportioned like a pie among four victorious powers, one of them a Communist dictatorship," Frederick G. Vosburgh, as assistant editor of the Magazine, writes.

"The dictator's minions hold the biggest section about 45 per cent, including most of the government buildings—or what is left of them."

"Ranging the countryside roundabout, the dictator's armies encircle the city. No train, truck, car, or barge can move in or out without permission. The only road link with free territory is the autobahn from Helmsdorf in the British Zone—as far from Berlin as Harrisburg, Pa., is from Washington, D. C."

In Berlin's Soviet Sector, beneath banners urging the people to "Protect the remilitarization of Germany," dark military columns march—rifles-toting men in black jackboots, midnight blue uniforms, and black raincoats that recall the old Nazi SS troops.

Yet on May Day morning, Vosburgh and National Geographic photographer Volkmar Wentzel saw half a million Berliners gathered in a mighty phalanx on the free side of the Brandenburger Tor, war-scarred gate at the boundary between the city's two worlds. Thousands from the Soviet Sector poured across the line to stand with their friends in defiance of their Communist overlords.

Last year West Berlin's major political parties invited their Communist-ruled fellow citizens to express opposition to Communism, and their desire for free and secret elections, by mailing to the West Berlin city hall the stubs of their expired adult ration books. City hall desks were snowed under by more than 400,000 replies.

Berlin Reborn

Despite the knowledge that they live on a battleground of psychological warfare, West Berliners do not act like people under siege. They are cheerful and alert, extremely proud of the progress they have made in rebuilding a peaceful life.

Although 85 per cent of Berlin's production facilities were dispersed, destroyed, or taken east as Russian reparations at the end of the war, industry has made a surprising comeback in the Western sections despite the Soviet stranglehold.

Much of the rubble left by wartime bombing has been cleared. Salvaged bricks and stones go into new construction backed by the Marshall Plan. Music, art and higher education have had a rebirth.

Moonshine Making Reported Moving into Big Cities

CINCINNATI—It's the city slickers, and not the country folk, who are adding to the woes of government men charged with stamping out the output of illicit moonshine.

Revenue agents, who once stalked operators of illegal stills mainly in remote rural areas, now are also tracking down moonshiners in the big cities. The newcomers have added substantially to the bootleg traffic, according to John W. Woelfle, special assistant to the general counsel of Schenley Industries, Inc., who said that seizures of stills during the latest 12-month period totaled 19,644—close to the rate reached during the peak of the Prohibition era.

"The mushroom-like growth of the trade in raw, unaged and untaxed bootleg whiskey has created a new era marked by crime and racketeering," Woelfle said.

Marine Mess Sergeant Tells How To Rouse Late Sleepers

WITH THE FIRST MARINE DIVISION IN KOREA—Staff Sergeant Roy L. Watson, Jr., a battalion mess sergeant from Denison, Texas, has a hint for the housewife who can't rouse her family for breakfast:

Just have a battery of Marine rockets fire at daybreak.

Leathernecks who have stood a fighting vigil all night would rather sleep than attend breakfast. Sergeant Watson has learned that during the last nine months in Korea. But when he learned the rockets were going to fire on a Communist-held hill at daybreak he had the foresight to scramble a full ration of eggs.

The ear-splitting blast from the rapid fire rocket launchers lasted two minutes.

Five minutes after the last roar Sergeant Watson had the chow line going. A full complement of wide-awake Marines was there, all hungry, too.

U. S. 4th in tonnage of ships under construction, on order.

'Twas Too Good

Poking about in a public library last week, a young lady ran across a book that aroused her immediate and intense interest when, on the title page, she encountered this encouraging assurance:

HOW: To Reach Men
To Hold Men
To Teach Men
To Win Men
It Has Been Done

Unfortunately she was considerably let down by a clump of type at the bottom of the page: "Tells How to Run Your Bible Class. Published by the Sunday School Times."

Lifesaver

Most people can't stand prosperity. But fortunately most people don't have to.

There's A Limit

How far a fisherman will stretch the truth depends upon the length of his arms.

Changing Custom

Fewer men are tied to their wives' apron strings these days because fewer wives wear aprons.

Conspiracy

When two women become friendly it is a sign that a third woman has lost two friends.

BEHIND ON THE NEWS

A salesman in Missouri was held up in a small town because heavy rains had caused a washout on the railroad. "This looks like the flood," he observed to a waitress in the local hotel.

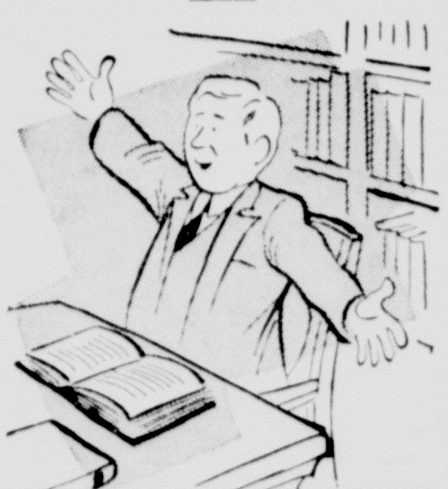

"The what?" she asked. "The flood," he repeated. "You know the flood when Noah saved the animals on the ark. You must have read about that."

The waitress assured him gravely. "Mister, on account of all this rain, I ain't seen a paper in four days."

Aftermath

Alimony is like paying off the installments on the car after the wreck.

EDUCATION BY THE FOOT

When Thomas Edison was a young man, it occurred to him that he was handicapped by the lack of a formal education. A person of great determination, Edison decided to teach himself, by reading the books in the library.

One day, a few weeks after he had undertaken this ambitious task, the librarian noticed him at a corner table.

"Well, Tom," she asked, "how much have you read?"

"Oh, about 15 feet," he said. He had started at one end of the library and was reading every book on the shelf, regardless of the contents!

WHO KNOWS?

"What did you come to college for anyway?" asked the disgusted professor. "You are not studying."

"Well," said the student, "Mother says it's to fit me for the presidency; Uncle Jim, to sow my wild oats; sister Helen, to get a chum for her to marry; and Dad, to bankrupt the family."

Proof Enough

A middle-west draftee claimed exemption on the grounds of poor eyesight and brought his wife as evidence.

Gamblers lying low, expecting reform to blow itself out.

NATIONAL DEBT

At the end of December, 1951, the national debt stood at \$259,460,778,794, compared with \$256,731,304,988 one year ago.

POPULATION

The Census Bureau's January 1st estimate of the population of the United States is 155,800,000. This

total is expected to hit 156,000,000 during January. The 1950 census counted 151,130,000 Americans at home and in the armed forces abroad.

MEAT

Because of dwindling feed-grain supplies, the Agriculture Department is predicting that, contrary

to hopes, the nation will get little more meat this year than it did in 1951. Last year's average was 140 pounds per consumer.

Miss Ida Shepherd of Washing, Okla., is visiting in the home of Mrs. J. L. Moore.

Connally Seeks To Bring Tidelands Bill To Senate

Senator Tom Connally has introduced a resolution to discharge the Senate Interior and Insular Affairs Committee from further consideration of the bill confirming state ownership of the tidelands.

"I am introducing this resolution," Senator Connally said, "because of the delays which consideration of the tidelands matter has encountered in the Interior Committee. The bill passed the House July 30, 1951—five and a half months ago.

In all of that time, the Interior Committee despite urging from us to act has failed to report the bill. I am therefore taking this means of bringing the matter before the full Senate so that the bill can be placed on the calendar.

"It is of the utmost importance that the Senate be allowed to act on the tidelands bill. I am confident that, if the Senate is allowed to act, it will pass the bill and correct the outrage perpetrated by the Supreme Court.

"It is important, also, that the Senate act promptly, early in the session, so that we will have time enough to overcome the delaying tactics which the advocates of federal ownership are obviously using.

"At the earliest opportunity, I shall move that the Senate consider my resolution discharging the Committee and that the Senate then consider the bill itself.

The text of the resolution introduced by Senator Connally follows:

"Resolved, That the Committee on Interior and Insular Affairs be discharged from the further consideration of the bill (H. R. 4434) to confirm and establish the titles of the States to lands beneath navigable waters within State boundaries and to the natural resources within such lands and waters, to provide for the use and control of said lands and resources, and to provide for the use, control, exploration, development, and conservation of certain resources of the continental shelf lying outside of State boundaries."

Spring Clean Up Campaign Needed By All Texas Towns

State Health Officer Geo. W. Cox today spelled out in one-two-three orders the requirements for a city-wide sanitation drive that will "show results in fewer flies, fewer rats, and less disease."

His plan in brief: Apply the idea of a good spring cleaning outside as well as inside the house.

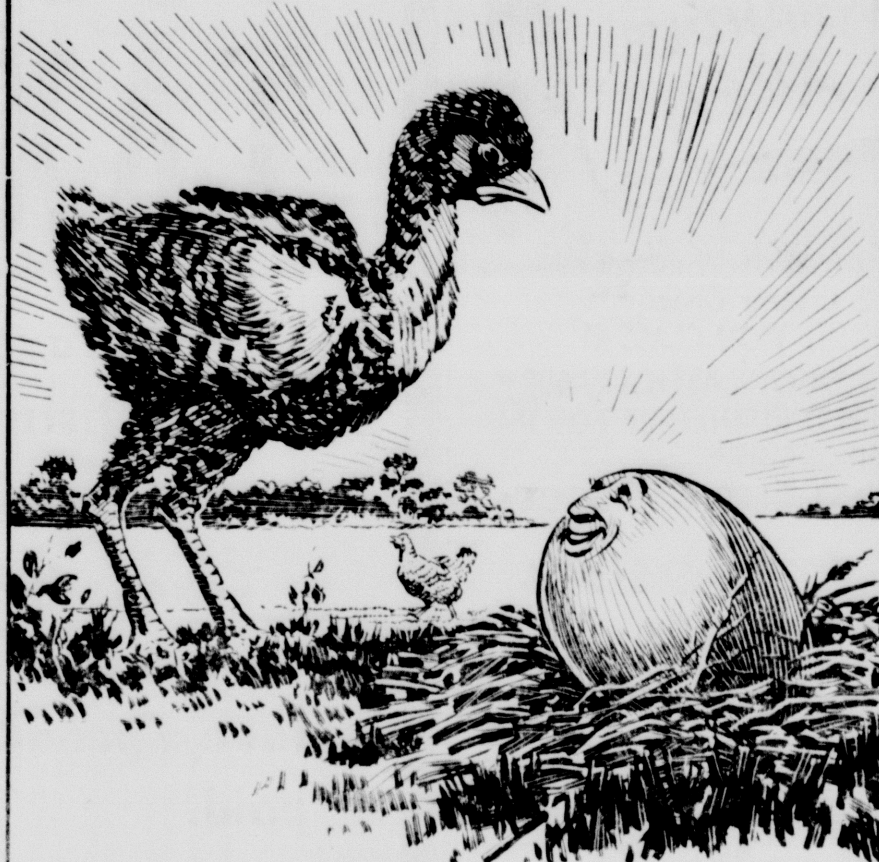

The long-time exponent of clean environment said the State Department of Health would, on request, send a team of sanitation experts to survey any Texas town for health hazards.

"An untrained person might fail to see the significance of horse lots, surface toilets, or stagnant water holes where flies and mosquitoes can breed. Our people, by training and experience, know how to locate and correct hazards to community health," the health officer said.

OUR DEMOCRACY—by Mat

SPENDING OR SAVING—WHICH COMES FIRST?

THAT QUESTION IS REMINISCENT OF THE OLD SAW ABOUT THE CHICKEN AND THE EGG—SO INTERDEPENDENT HAVE SPENDING AND SAVING BECOME IN OUR MODERN COMPLEX SOCIETY.

THE MACHINES WHICH MAKE POSSIBLE THE VAST ARRAY OF GOODS ON WHICH PEOPLE SPEND THEIR MONEY ARE FINANCED BY THE PEOPLE'S SAVINGS.

IN THE PRODUCTION OF ALMOST EVERYTHING YOU USE, FOR EXAMPLE—WHETHER IT'S CLOTHING OR CARS, TOASTERS OR TRACTORS, PHONES OR PLANES—THE INVESTMENT OF LIFE INSURANCE FUNDS HAS A PART.

ficer said.

The survey would include a check on the manner of garbage storage, collection, and disposal, and a look into foodhandling establishments to see if their foods are coming from safe sources.

The team, according to the doctor's plan, would make a study of the local water supply. Contaminated? If so, what's the reason and how can it be corrected most efficiently?

They would investigate the sewerage system. Do lines extend into all areas of the city? Are all residences connected? Is the plant itself adequate to accommodate the city? How is the sewage processed?

Residential and business districts would be inspected for sanitary violations, and each property owner would be strictly accountable for cleaning up his premises, with the city hauling away accumulations of trash.

"If we all begin work right now, using tried and proved methods, we can cut down the incidence of diseases caused by insanitary environments, contaminated water, and improperly handled foods. We can stage a fight against flies and stop them from spreading disease.

"We're here to help," the doctor said.

Highway Week in Texas To Open Sunday, January 27

Observance of Highway Week in Texas, January 27-February 2, will get a head start in Austin at 3 p. m., Sunday, January 27, when Gov. Allan Shivers will officially usher it in. A special program will be held in the senate chamber of the State Capitol, at which he will be the principal speaker. The program will be broadcast during the afternoon by most of the stations of the Texas Liberty network.

Honor guests invited to attend the program are the living former governors of Texas and all members of the Highway Commission, both present and former Commissioners. In addition all members of

the House and Senate have been invited to attend. After the program coffee will be served by Hon. Ben Ramsey, Lieutenant governor, in his quarters adjoining the Senate Chamber. Hon. Reuben Senterfitt, speaker, will participate in this hospitality.

J. H. Kultgen of Waco, president of the Texas Good Roads Association, will be master of ceremonies. Others on the program will include Judge George Prowse of Corpus Christi, president of the Texas County Judges & Commissioners Association, and Mayor Armistead Rust of San Angelo, president of the Texas League of Municipalities.

E. H. Thornton, present chairman of the Highway Commission, also will speak briefly.

During the week there will be speaking programs before most of the service clubs of Texas, telling of the need of more and better highways and commending former highway commissioners and those who have contributed to promotion of good roads in Texas.

Youth Week In Texas Proclaimed By Governor Shivers

AUSTIN—Governor Allan Shivers has proclaimed Jan. 27 to Feb. 3 as Youth Week. "In these crucial times we need young people who are willing to act upon their religious convictions," said the governor. "We need them in Texas, in our nation and in our world."

Youth Week is sponsored by the United Christian Youth Movement, youth agency of the National Council of Churches of Christ in America. It represents 10 million Christian youth of 38 cooperating denominations.

Highlighting the week is The Call to Action in an endeavor to enlist a million youth for Christ.

"The Call is made to order for the work of the Texas Youth Development Council," said its chairman, Rev. Walter K. Kerr of Tyler. "Our young people must be motivated by adequate religious convictions," he stated, "and they must be unified by objectives that

will produce significant action." The principles of The Call are not only a call, but an answer, he pointed out. "The core of the program of United Christian Youth action is in the local community," Mr. Kerr said.

ONE MINUTE SPORTS QUIZ

1. Who holds the all-time pole vaulting record?
2. In what sport is Woodchuck considered a comer?
3. For what was Maureen Connally recently honored?
4. Who is Mel Hein?

THE ANSWERS:

1. Cornelius Warmerdam — 15 feet 7 inches and 3/4 inches.
2. A football contest between college and pro gridgers in Honolulu, of which there are two each January.
3. Horse Racing. The colt is considered a top prospect for national honors.
4. She was voted Female Athlete of 1951. She is national tennis champ.
5. Star pro footballer, who holds the record for more seasons as a pro.

TRUCKS

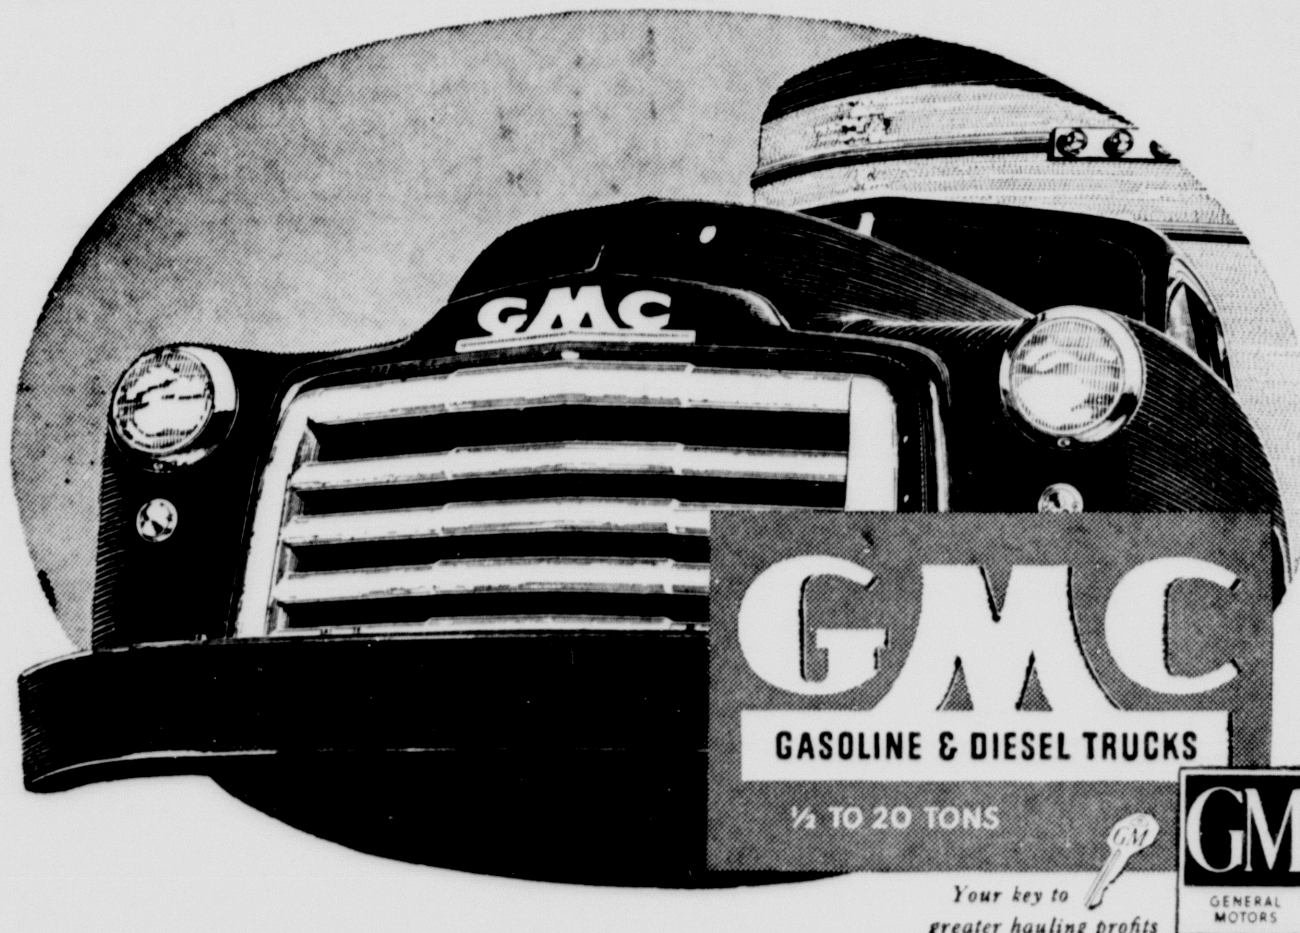

The United States has more than one-half of the trucks and trailers in the world, according to the American Trucking Association, which estimates that there are more than 8,000,000 motor trucks and trailers in use in this country. These trucks provide employment for more than five million workers, pay \$1,161,000,000 a year in special highway taxes, use 568,000,000 quarts of oil, 8,500,000,000 gallons of gasoline a year and haul 9,000,000,000 ton-miles of freight.

THE AMERICAN WAY

But Not The Right To Destroy

Invest Your Printing Money in Canyon

HERE'S WHY -you see more every day!

EVER stop to ask yourself why you see more and more husky GMC's on every highway every day? Why so many cost-wise buyers are singling out GMC's as their first choice?

The answer is, "GMC" spells profit to the man whose business depends on the performance of his trucks.

To light-truck users, "GMC" means the highest horsepower in its class—for GMC 1/2- to 2-tonners are second to none in pulling power.

And to commercial haulers, "GMC" means America's most popular Diesel

—for efficiency, for long-lasting, fleet-footed power and lowest operating cost.

And in between, throughout the GMC line—from the smallest gasoline-powered pickup truck to the largest Diesel—the story's the same:

Power, brakes, comfort, safety and stamina—the right combination of everything essential to low-cost hauling—in the right vehicle for your loads.

Before you buy another truck—come in. See for yourself why GMC is the best truck buy you can make today.

Prime Minister Churchill

Prime Minister Churchill has just concluded his address to Congress. The floor was crowded with all of the dignitaries of this country and representatives of foreign countries. The galleries were packed. He was welcomed by a standing ovation and appeared deeply touched. He fully lived up to his reputation as the outstanding orator of the age. He made no pretense concerning the purpose of his visit.

In his opening remarks he stated bluntly that he did not come to ask for money. However, he subsequently explained the needs of the British people for materials and equipment. The darkness of the situation in the Near East was not minimized and he did not attempt to soft-pedal the great responsibilities that are faced on the European continent and in the Far East.

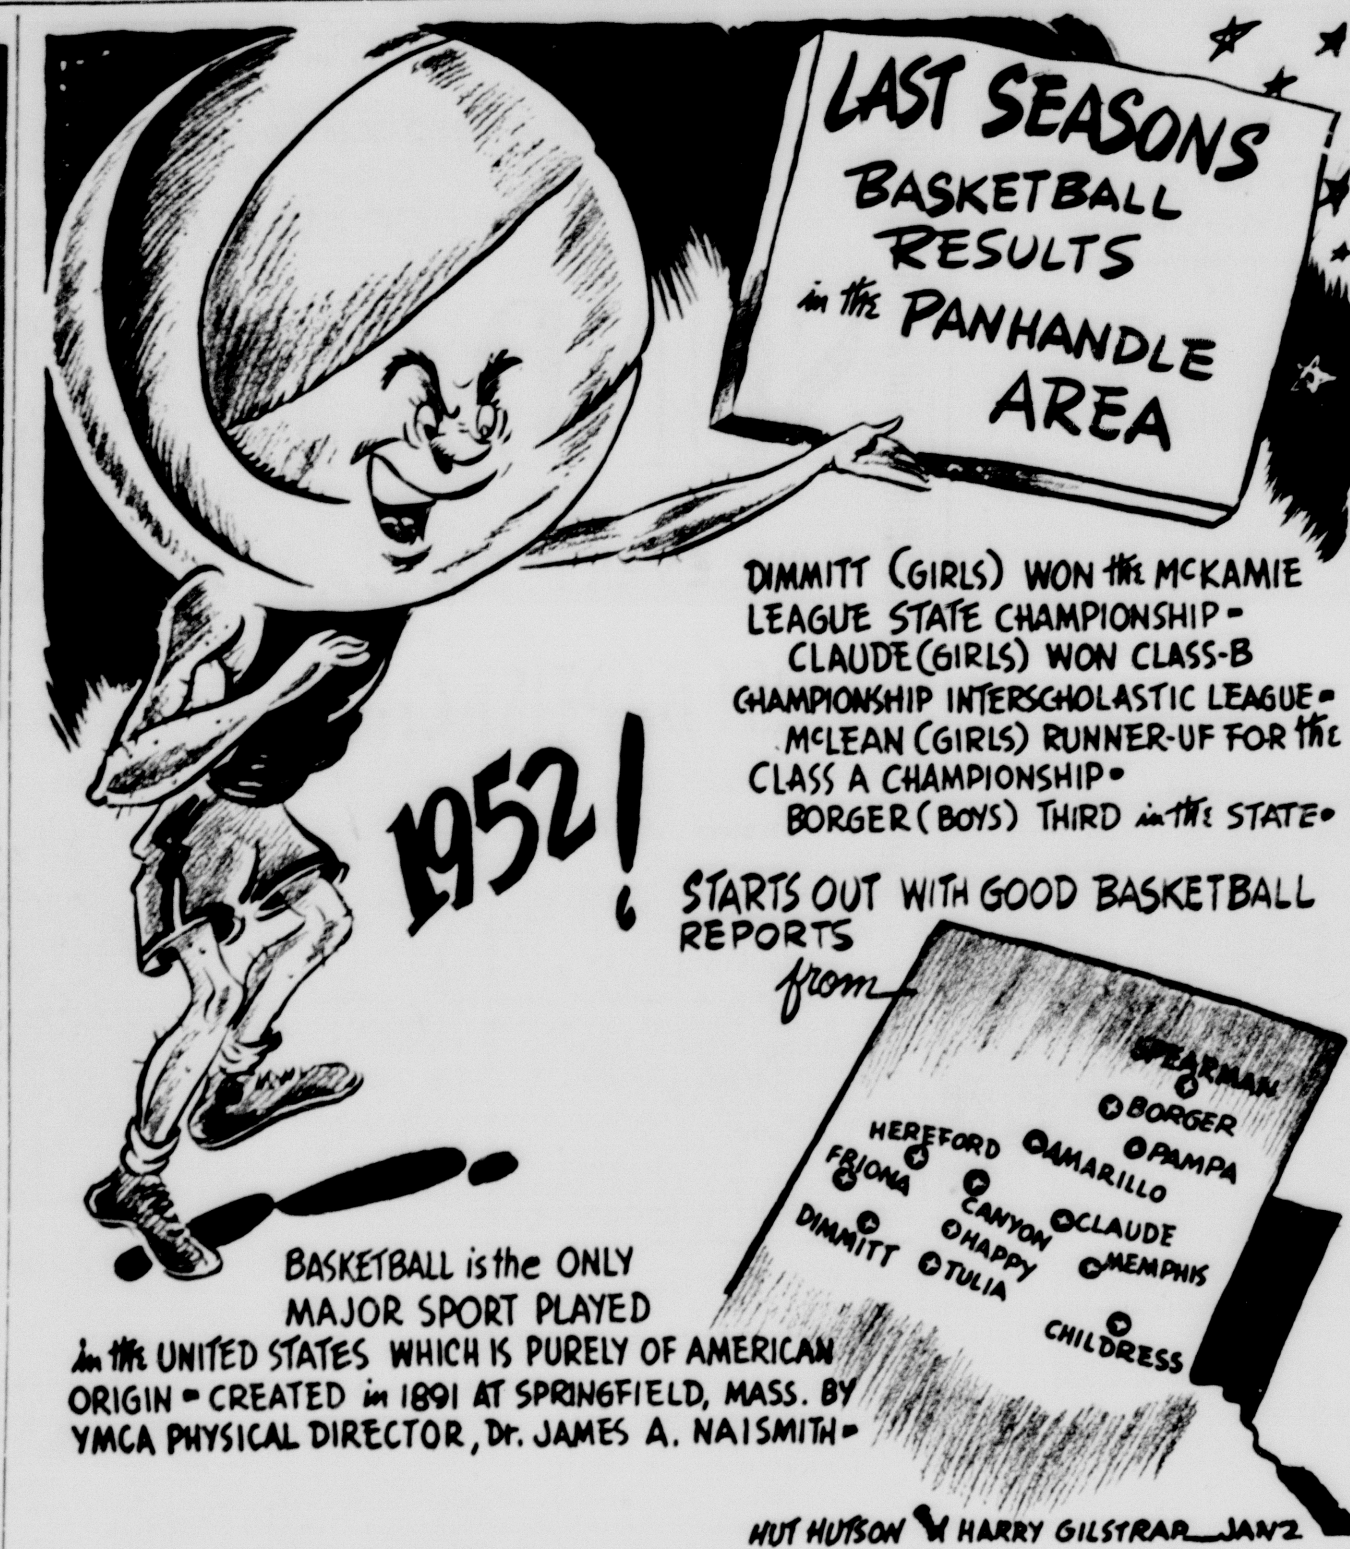

In my opinion, his words reflected full recognition that this country is expecting value received for additional foreign expenditures; that the American people are not going to pour out funds for foreign aid unless they retain the reins of control on the expenditures.

I also feel that his speech was intended as a clear warning that the English speaking people must remain united if they are to meet the full requirements that will be required by the aggressive communism that now plagues the world. The full import of his remarks will be made more clear by the demands that will be made upon Congress within the next few months.

As I stood in the chamber during the ceremonies, the terrible thought occurred to me that if Russia should drop an atomic bomb at that particular instant, practically the entire officialdom of the United States, the head of the British Government, and prominent officials from the other governments of the world would be wiped out in one full swoop. At this thought I immediately began to scratch the chamber for representatives of the Russian Embassy and was unable to locate any.

Farmers and Ranchers

In a prior newsletter I called attention to the attempt by certain

groups in this country to do indirectly what the Congress would not do directly. That is, extend the coverage of interstate commerce to all segments of American business. Such procedure would place many of the small businesses under regulatory measures to which they are not subject unless they are engaged in interstate commerce. Until recent years a business man, farmer or rancher could decide for himself whether he would engage in interstate commerce, but under the late decisions and administrative rulings, this right of election has been practically lost. The farmer and rancher is at present under interstate commerce regulations. This means that he is subject to regulation by all federal laws, including the Fair Labor Standards Act, which is the act that provides, among other things, minimum wages and maximum hours.

The only reason that the farmers and ranchers are not subjected to the minimum wages and maximum hours provisions of the Act is because of an express exemption contained in the Act. Should this express exemption be repealed, either directly or by inference, the farmer and rancher would be

required to comply with the minimum wages and maximum hour provisions, including the provision for time and a half and double time.

The farm and ranch organizations should keep this matter primarily in their thoughts, as it is most important to all. A repeal of that express exemption could do untold damage to the farmer and rancher, especially those in our section of the country.

The forces that advocate such repeal are still at work, but most of us here who are interested in agriculture are on the alert concerning this, and want you to be the same.

The Tidelands

You can expect the Tidelands issue to be pressed hard within the next few weeks in the Senate. The vote on the bill will be a pretty good indicator of its chances to pass over the almost certain presidential veto.

Taylor of Stanford is selected as football's coach of year.

Democrats are planning court tests of redistricting bills.

United States air strength in Britain swells since 1948.

FOREIGN TRADE

The foreign trade of the U. S. spurred by the huge raw materials needs of the defense program and inflationary effects of the Korean war, reached new high levels in 1951, of \$25,800,000,000, against \$19,126,000,000 in 1950, a gain of more than thirty-three per cent. Of the total about \$14,600,000,000 represented exports and \$117,200,000,000 were imports. The latter figure sets a new high, while exports were under the 1947 peak of \$15,340,000,000.

LIFE INSURANCE

Total life insurance owned by the American families throughout the nation increased through 1951 to the record level of \$253,000,000,000. This represents an increase of \$131,000,000 over ten years ago and was \$101,000,000,000 more than at the end of World War II.

NEW STAMP

A new three-cent stamp, commemorating the 20th anniversary of the birth of Betsy Ross, who is credited with having stitched together the Stars and Stripes in 1776, was placed on sale first in Philadelphia, on January 2 and the following day at postoffices throughout the country.

For Outperforming all other American Cars...

In the Grinding Tests that Won it
the Motor Trend Magazine Award,
Chrysler proved itself the Best
Engineered Car in America

CHRYSLER SURPASSED ALL OTHERS WHEN MOTOR TREND TESTED FOR:

- ★ Average Braking Distance In Feet
- ★ Ton Miles per Gallon
- ★ Average Acceleration In Seconds
- ★ Acceleration Over Standing 1/4 Mile in Seconds
- ★ Average Top Speed in M.P.H.
- ★ Maximum Road Horsepower
- ★ Pounds per Road Horsepower
- ★ Maximum Torque in Lbs.-Ft.
- ★ Maximum Brake Mean Effective Pressure
- ★ First in Total Points

15 different American stock automobiles—equipped as you buy them—were driven by Motor Trend Magazine as hard as steel and rubber can be driven. In these actual road tests of efficiency and performance, measured by the most accurate instruments obtainable, Chrysler proved itself superior to all others. In 13 tests Chrysler was first in 7—tied in 2, making a total of 9 out of 13... and first in total points!

Only by taking an engine to the limit of its potential, only by turning the corners at high speeds, applying brakes for emergency stops, torturing body, springs and shock absorbers, can you learn just what performance you can expect from the make of car you drive. The results of the Motor Trend tests were conclusive... as Chrysler, again, proved itself the one best car in America.

The Motor Trend Award, like numerous other honors today's Chrysler has won, is both a proof of and a tribute to Chrysler's magnificent Fire-Power engine and master engineering. Each demonstrates why, among men and women who know automobiles... Chrysler is always the first choice.

CHRYSLER

finest engineered cars in the world

Just Between You, Me and ... the Gatepost

After the story about the new seats for the Olympic Theater appeared in The News last week, Charlie Donnell came in to explain the reason for the delay in getting the new seats here. It seems that the seats are going to be sort of individually tailored to the Olympic Theater. That is to say the seats are especially manufactured to the incline of the floor. Perhaps this means that you won't have to look to the right or the left of the person sitting in front of you.

Speeches have been on the receiving end of many jokes recently. There was the time when the old one about the Texas Longhorn was popular. That was to the effect that the speech had a point here and one there and a lot of bull in between.

Clark Jarnagin likes the more modern names for speeches. He calls them kimona, girdle and brassiere speech. In the kimona speech he says there's too much material to cover the subject. The girdle speech is compressed into too small a space while the brassiere speech merely places emphasis upon a couple of points.

Fate is that inexplicable something that makes you say 'no' when you mean 'yes.' It's the same thing that makes junior eat his spinach before company after you have told them that he never touches the stuff. Last week fate stuck his priggish nose into the weather and crossed up one of our news stories. Even though the turn of events was a good thing, it made the story about danger to grass fires look as out of place as snowballs in the tropics.

The dry condition of the grass and trash added greatly to the danger of such fires and this was what the story was about. The next day after the story was set up, it rained. Perhaps the next time we need a rain the thing to do will be to write a group of stories on how dry the weather is.

The Chamber of Commerce banquet last week was a great success and Cecil Massey is to be congratulated upon the wonderful job he did in making the arrangements. One of the comments noted about the crowd was the difference in ladies' hats. It was really a charming sight to look around in that sea of bobbing heads and note the many charming types of headgear worn by the ladies.

There's an old saying that Kentucky is the home of fast horses and beautiful women. Some joker turned it around and said that Kentucky was the home of fast women and beautiful horses, but it seems that the natives of that state failed to see the gentle humor in the joke. So if you plan to use it, be sure there's no native of Kentucky about.

Talking about speed is a reminder of the caution needed in driving today's high powered cars. Most people don't realize how fast they are really driving until they are brought to a sudden stop. High speed and three lane highways add up to a death trap. If you're meeting a car that is being driven at the same speed, the two vehicles are coming together at the rate of 120 miles per hour. This means that you'll meet in 30 seconds. So if you pull out in the center lane to pass a car and the other car is doing the same thing, and you're a mile apart to start with, you have less than 30 seconds to get around the car you're passing and safely into the right lane. If such factors in speed and time were given more thought, there would be fewer accidents especially on three lane highways.

Dudley Bayne and Dr. Chas. R. Nester are doing a wonderful job in keeping the Cub Scout organization growing bigger and better. Dudley Bayne mentioned that the pack would swell by several new members at the next meeting which is next Monday, January 28th. This meeting will also be used by the scouts to plan a banquet. Definite date for the banquet has not been set, however, it was announced that it would be near the end of February.

Bayne also expressed his appreciation at seeing the former scout troop 66 revived. He said that the scouts had an excellent master in Stuart Condon and that under his and Edwin Pettit, assistant scout master's guidance, the troop should be a wonderful organization.

For those quail hunters who went out during the final days of the season and didn't get any birds, you might resolve to do some skeet shooting. Pat Britain is one of these luckless fellows and he's talking about getting his shooting eye in shape by practicing on the clay pigeons. Pat's pill was made even more bitter because of the fact that everyone else in his party got their quota.

If you've lost a fender skirt or some fender skirts from a Ford, you might find same at the sheriff's office. Deputy Lem Pounds was in last Friday to give us the report on a fellow who was picked up and had three of these fender skirts in his possession. Two of them were said to be removed from a Ford car parked down at Hall's and the other was taken from a Ford parked on the west side of the square.

The State Department may have made a mistake in covering up its disloyalty cases by edging out suspected personalities just as security sleuths were closing in. The tendency in loyalty boards now is to be suspicious of a Department that could find no disloyal officials while other departments were turning them up in fairly sizable numbers.

Help Keep Canyon Clean!

Trailer Life Inexpensive, Happy Existence

NEW YORK—"I wouldn't live in a house again if you paid me." That's how one New England trailer housewife summed up her feelings about life in a mobile home.

Her reasons coincided with those cited by many of her sister home-makers in a recently completed survey of typical East Coast trailer park dwellers. Somewhat surprisingly, nearly 50% of the women interviewed went on record with statements expressing a firm intention to live in mobile homes permanently.

The women were pretty much in agreement concerning the things they liked about their houses on wheels.

Less Expensive

"Trailer life is much less expensive, especially after your coach is paid for," said one housewife. "It's an easier life, with very little housework and extremely little upkeep," said another. "And no storm windows to bother about," added her husband.

"Trailer people are more friendly and sociable," a third woman pointed out, while a fourth contended that "A mobile home gives you freedom to move if it becomes necessary or desirable—if you want, you can spend your winters in the south and your summers in the north."

Many of the women polled simply summed up their mobile home likes in the phrase: "We just like trailer life."

Housework in a house on wheels, say trailer wives, ceases to be a chore—because it can be done so quickly. In one national survey, for example, more than 40% of the mobile home-makers reported that their daily clean-up and pick-up routine took only 25% as much time as was required to keep the average apartment or house in spic and span shape.

Similar findings were gleaned in the East Coast survey, in which the ladies claimed they could do their housework in one to two hours, as compared with two to four in a flat or apartment with the same number of rooms.

Compact Virtues

The difference, according to trailer designers, is in the compactness and space-conserving virtues with which the modern home on wheels is built. Thus 79% of trailer wives interviewed in the national poll reported that their kitchens were more efficiently laid out than are those in a typical house or apartment. The designers have referred to this ingenious trailer space trick as "making feet out of inches."

"Dimensions," they say, "do not determine livability; it's how the space is used that counts."

In a trailer home, every inch of space is used to the best possible advantage. Unlike most houses and apartments, the space in a wheeled home is not wasted. Ordinarily unused wall areas, for instance, become built-in cabinets or closets. A dressing table bench does double-duty as a clothes hamper. One chair may convert into a table capable of seating six people; another may open up into a spare bed.

Trailer wives' fondness for their rolling homes is not born of necessity, from any inability to afford standard housing. According to the surveys, annual income for a typical mobile home owner is over \$4,000. That's well above the national average of \$3313.

How big is a trailer home? Well, the average East Coast trailerite polled owns a three-room, 30-foot coach. Approximately 43% of those interviewed own television sets. Many have phones, and virtually all have radios.

Typical family size is three or less; children tend to be of preschool age; and the average family food bill runs to about \$25 a week.

Lawyer Learns Flying at 72; Says He doesn't Feel 'Old'

ST. LOUIS—At 72, Dr. Norman Bartless, a lawyer, doesn't feel old, and he proves it.

He recently completed 20 hours of instruction in flying and then took off on his first solo. He performed so well that instructor Ray Branson reported that the nimble lawyer "flies better than a lot of people half his age."

In explaining why he wouldn't let the age factor keep him down, Dr. Bartless said: "I wanted something to get me away from my work. I don't feel old, so I can't see why I shouldn't learn to fly."

Too Many 'In-Laws' Turn Up In Accident Incident

LANCASTER, Pa.—It's a small world. In fact, sometimes it is much too small, as in the case of Albert Eberly, who recently had a full share of unexpected "in-law" trouble.

Eberly, 46, from nearby Stevens, lost control of his automobile and it smashed against a parked car. Investigation proved the car was owned by his father-in-law.

Eberly complained that the lights of another parked car had blinded him temporarily. That car, you guessed it, belonged to his brother-in-law.

Lions Enjoy Rare Treat As Guests Of Globe-Times

"And a good time was had by all." This line which usually ends a story is in reality the beginning of the treat the Canyon Lions enjoyed in Amarillo last Wednesday. The luncheon in the Old Tascosa of the Herring Hotel was the climax of a forgotten engagement by Wes Izzard.

The way the entire procedure worked out, both the Lions Club and Mr. Izzard enjoyed a free meal. Mason King of the Globe-Times newspaper made all of the arrangements, and it was the newspaper that ended up paying the bill.

Weldon Bright replaced the Lions Club sweetheart at the piano as the Lions growled through a couple of songs. After the growling ceased the club settled down to a delicious meal of roast beef, baked potatoes, salad, hot rolls, coffee and peach short cake for dessert.

The treat did not end with the meal. Mason King had John E. Eissom on the program with a large group of magic tricks. Sissom started the program with a little game called pass-the-glass. A glass was picked up from the table and music was played. When Sissom blew a whistle, the glass was temporarily stopped. Twice the magician had people drop coins in the glass, but when it stopped the third time that person got to keep the coins which were in it.

Spotting A. K. Goodman, a former teacher of his, the magician boldly marched back and yelled in the ear of Goodman, "Gonna do a card trick." Throughout the entire program the magician continued to keep Mr. Goodman informed of the procedure in this manner.

From time to time the magician would take a banana out of his pocket and take a bite of it. Finally his magic turned on him and when he took a bite of what he

thought was a banana it turned out to be a wiener.

Magic also solved the drinking water problem of the magician. He had a small container and it appeared empty after each glass he drew from it, but every time he tipped it up again it yielded another glass of water.

One of the magician's tricks cost Dutch Cleavinger a dollar. In order to be sure that the bill was not switched about, Dutch wrote his name on it. Then the magician appeared to stuff the bill in a small envelope and burn it.

On the other side of the house T. V. Crounse selected an egg. The magician had the egg broken and fished about in it for a moment and came up with the dollar which Dutch had signed. Then he asked, "This is the dollar that you gave me, isn't it?" When Dutch agreed, the magician said thank you, and tucked the dollar away.

The final trick was one of the best the magician performed. He took a folded piece of paper and began tearing it. When he finished tearing out tiny pieces, the magician unfolded the paper and held it up and the Lions gasped in amazement. The paper was torn into an intricate design with the word 'welcome' appearing across the top and the word 'Lions' appearing at the bottom.

Frank McKinney, who heads the Democratic National Committee—in outlining campaign strategy for Democrats in 1952—is taking credit for the high-level activity that goes with wartime inflation, but Republicans point out that he is not assuming responsibility for the lives and limbs of American boys that are sacrificed to produce the good times for voters who stay home.

J. Howard McGrath, Attorney General, is hopeful that his new cleanup drive can substitute for the commission President Truman wanted Judge Thomas Murphy to head. The Attorney General is somewhat handicapped by an impression in Congress that the Justice Department itself has been in need of a cleanup.

Dwight Eisenhower has given a good many experienced and distinguished visitors the definite impression that he would like to live in the White House in Washington. The story that "Ike" really prefers to live on his Pennsylvania farm is not supported by the attitude displayed to most of those who see the General.

The letter from Justice William O. Douglas telling Mr. Truman that the Justice did not intend to run

for President was a surprise to the White House. President Truman had been unaware that a Douglas-for-President movement was under way out in the country.

W. Stuart Symington, stepping out as RFC Administrator, stood alone against Dean Acheson, Robert Lovett and Charles Brannan when those Cabinet members put on pressure to pay higher prices to foreign producers of tin.
